Land Use In An Urban Environment:

Land Use Considerations in Urban Environmental Management Janis D. Bernstein, 1994 In rapidly growing developing country cities distorted land markets and ineffective urban land management often have resulted in the degradation of environmentally fragile land occupation of hazard prone areas loss of cultural resources open space and prime agricultural land and excessive urban sprawl The paper presents the most promising land management approaches and instruments for protecting sensitive resources managing hazard prone areas protecting cultural resources conserving open space discouraging excessive urban sprawl and managing prime agricultural land Adapt du r sum de l auteur

Land and the City Philip Kivell, 2002-11-01 First Published in 2004 Presents a broad analysis of land use patterns and processes in urban areas Land has the greatest significance for the spatial patterning and functioning of modern urban settlements and societies providing the basic morphological elements of the city it is a source of social and economic power is intimately bound up with environmental issues and lies at the heart of planning This book examines the way in which land is allocated and used in both theoretical and practical senses The author examines the empirical data to reveal the sources and nature of land how land is used and how those uses are changing in the contemporary city Particular attention is paid to the misuse of land through vacancy or dereliction He also explores the importance of land ownership and the principles of land policy using case studies Finally he assesses the land use implications of major urban change deindustrialization counter urbanization and new technology For the first time the overall significance of land use and ownership are examined in an urban geographical and planning context

Urban Land Use Planning Francis Stuart Chapin (Jr.), Edward John Kaiser, 1979

Land Values and Land Use Within an Urban Environment David Stephens, 1971

Urban Land Use Planning Philip Berke, 2006 Divided into three sections this edition of Urban Land Use Planning deftly balances an authoritative up to date discussion of current practices with a vision of what land use planning should become It explores the societal context of land use planning and proposes a model for understanding and reconciling the divergent priorities among competing stakeholders it explains how to build planning support systems to assess future conditions evaluate policy choices create visions and compare scenarios and it sets forth a methodology for creating plans that will influence future land use change Discussions new to the fifth edition include how to incorporate the three Es of sustainable development economy environment and equity into sustainable communities methods for including livability objectives and techniques the integration of transportation and land use the use of digital media in planning support systems and collective urban design based on analysis and public participation

Peri-urban futures: Scenarios and models for land use change in Europe Kjell Nilsson, Stephan Pauleit, Simon Bell, Carmen Aalbers, Thomas A. Sick Nielsen, 2013-02-05 Presently peri urbanisation is one of the most pervasive processes of land use change in Europe with strong impacts on both the environment and quality of life It is a matter of great urgency to determine strategies and tools in support of sustainable development The book synthesizes the results of PLUREL a large European Commission funded research project 2007 2010 Tools and strategies of PLUREL address main challenges of managing land use in peri urban areas These results are presented and illustrated by means of 7 case studies which are at the core of the book This volume presents a novel future oriented approach to the planning and management of peri urban areas with a main focus on scenarios and sustainability impact analysis The research is unique in that it focuses on the future by linking quantitative scenario modeling and sustainability impact analysis with qualitative and in depth analysis of regional strategies as well as including a study at European level with case study work also involving a Chinese case study

The Security of Water, Food, Energy and Liveability of Cities Basant Maheshwari, Ramesh Purohit, Hector Malano, Vijay P. Singh, Priyane Amerasinghe, 2014-06-13 The population of cities around the world is growing at an alarming rate and as a result the landscapes of most cities are going through enormous changes In particular fertile agricultural lands at the periphery of cities are being developed without consideration of holistic planning As such peri urban areas zones of transition from rural to urban land uses located between the outer limits of the urban and the rural environment are experiencing significant losses of agricultural land increased runoff and water quality degradation Concurrently the demands for water food and energy are increasing within cities and unless a balance is struck the liveability of these cities will soon be compromised The current water and land use changes have serious consequences on lifestyle environment health and overall well being of urban communities This book therefore helps readers to understand the current issues and challenges and examines suitable strategies and practices to cope with current and future pressures of urbanisation and peri urban land use changes The book examines a number of critical aspects in relation to the future of cities and peri urban regions including the suitability of policies and institutions to sustain cities into the future impact of current trends in land use change population increase and water demand long term planning needs and approaches to ensure the secured future for generations ahead and strategies to adapt the cities and land uses so that they remain viable and liveable The readership of the book will include policy makers urban planners researchers post graduate students in

Subhrajit Guhathakurta,2013-06-29 This volume is the result of an invited symposium titled Integrated Land Use and Environmental Models A Survey of Current Applications and Research that was held in October 2000 at Arizona State University The idea for the symposium arose from a belief held by many academics that we are at the watershed of a new generation of models that are more dynamic more pragmatic more interdisciplinary and more amenable to collaborative decision making Several academics and professionals engaged in urban research had long realized that domain specific knowledge was inadequate for understanding and managing urban growth While interdisciplinary approaches have become critical in most social research one general area of knowledge that stands out as having the most wide ranging impact on current urban modeling efforts is the field comprised of environmental sciences and ecology The symposium offered a forum for academics and professionals engaged in urban and ecological modeling to exchange ideas and experiences specifically in areas that overlapped urban and environmental issues The contributions to this volume highlight the progress made in the various efforts to build integrated urban and environmental models More importantly each chapter shows how ideas have diffused across disciplinary boundaries to create better policy relevant models In addition this book outlines some promising areas of research that could make important contributions to the field of urban and environmental modeling Integrated thinking about urban and environmental issues has been fundamental to the concept of sustainability **Guiding Land Use**

Reenberg,2014-03-14 International experts examine the effects of urbanization and economic globalization on land use and offer new insights to advance understanding and sustainable practice Today global land use is affected by a variety of factors including urbanization and the growing interconnectedness of economies and markets This book examines the challenges and opportunities we face in achieving sustainable land use in the twenty first century While land resources remain finite the global population is projected to reach ten billion by the end of the century bringing issues of ethics and fairness to center stage Who should decide how land is used Where does competition for land occur and why Moreover accelerating globalization increasing demand for animal protein in our diets the need for new sources of energy and the global scarcity of land have led to a decoupling of land use and local control which raises issues of governance The contributors from a range of disciplines and countries present new analytical perspectives and tools for understanding key issues in global land use The chapters consider such topics as food production and land use case studies of urbanization and agriculture in Brazil and China telecoupling and connections to distant places emerging institutions of land use governance public and private
