How to wash a car

You will need

- A car
- Two buckets of water
- A few sponges
- A hose
- A wash mitt
- One or two towels
- Some car wash detergent
- A brush

Step one: **Begin by filling your bucket with water.** while it is filling, make sure to put a decent amount of car wash detergent into the bucket, along with the sponges and the wash mitt. After this is done, fill another bucket with plain water to use as a rinsing bucket.

Step two: **Next, begin to hose down the car, this will loosen up the dirt on the car.** make sure to do this step very well as you do not want to scratch your car later while scrubbing.

Step three: The wheels on your car are quite often the messiest, dirtiest part of your car so its a good choice to do this first so that dirt from the wheels does not make the already clean parts of your car dirty. Make sure to **scrub them** with a brush thoroughly to get all of the dirt on the wheels.

Step four: Begin to scrub your car with a washing mitt, before so, make sure to soak your sponge in the soapy water begin applying it to the car. **Make sure NOT to scrub the car with the brush as this will leave paint scratches.**

Step five: Scrub all the sections of the car clean, make sure to leave the front of the car for last as it is regularly the dirtiest section of the car. Once clean, use the hose to rinse the car down, removing the rest of the loose dirt from the car.

Step six: Leave the car out in the sun to dry for a while, in the meantime begin to clean things up. **empty your bucket, put the hose away, put the detergent back into the cupboards. Once the car is dry, you should move it out of the sun and into your garage.**
