Progress in Cryptology - INDOCRYPT 2006 Rana Barua, Tanja Lange, 2006-11-28 This book constitutes the refereed proceedings of the 7th International Conference on Cryptology in India INDOCRYPT 2006 held in Kolkata India in December 2006 The 29 revised full papers and 2 invited papers cover such topics as symmetric cryptography provable security fast implementation of public key cryptography id based cryptography as well as embedded systems and side channel attacks

Open Problems in Mathematics and Computational Science Çetin Kaya Koç, 2015-03-25 This book presents interesting important unsolved problems in the mathematical and computational sciences The contributing authors are leading researchers in their fields and they explain outstanding challenges in their domains first by offering basic definitions explaining the context and summarizing related algorithms theorems and proofs and then by suggesting creative solutions The authors feel a strong motivation to excite deep research and discussion in the mathematical and computational sciences community and the book will be of value to postgraduate students and researchers in the areas of theoretical computer science discrete mathematics engineering and cryptology

Stochastic Modeling and Optimization Methods for Critical Infrastructure Protection, Volume 2 Alexei A. Gaivoronski, Pavel S. Knopov, Vladimir I. Norkin, Volodymyr A. Zaslavskiy, 2025-05-13 Stochastic Modeling and Optimization Methods for Critical Infrastructure Protection is a thorough exploration of mathematical models and tools that are designed to strengthen critical infrastructures against threats both natural and adversarial Divided into two volumes this first volume examines stochastic modeling across key economic sectors and their interconnections while the second volume focuses on advanced mathematical methods for enhancing infrastructure protection The book covers a range of themes including risk assessment techniques that account for systemic interdependencies within modern technospheres the dynamics of uncertainty instability and system vulnerabilities The book also presents other topics such as cryptographic information protection and Shannon's theory of secret systems alongside solutions arising from optimization game theory and machine learning approaches Featuring research from international collaborations this book covers both theory and applications offering vital insights for advanced risk management curricula It is intended not only for researchers but also educators and professionals in infrastructure protection and stochastic optimization

Advances in Computer Science for Engineering and Education III Zhengbing Hu, Sergey Petoukhov, Ivan Dychka, Matthew He, 2020-08-05 This book comprises high quality refereed research papers presented at the Third International Conference on Computer Science Engineering and Education Applications ICCSEEA2020 held in Kyiv Ukraine on 21-22 January 2020 organized jointly by National Technical University of Ukraine Igor Sikorsky Kyiv Polytechnic Institute National Aviation University and the International Research Association of Modern Education and Computer Science The topics discussed in the book include state of the art papers in computer science artificial intelligence engineering techniques genetic coding systems deep learning with its medical applications and knowledge representation with its applications in

education It is an excellent source of references for researchers graduate students engineers management practitioners and undergraduate students interested in computer science and their applications in engineering and education

Identity-based Cryptography Marc Joye, Gregory Neven, 2009 What if your public key was not some random looking bit string but simply your name or email address This idea put forward by Adi Shamir back in 1984 still keeps cryptographers busy today Some cryptographic primitives like signatures were easily adapted to this new identity based setting but for others including encryption it was not until recently that the first practical solutions were found The advent of pairings to cryptography caused a boom in the current state of the art is this active subfield from the mathematical background of pairing and the main cryptographic constructions to software and hardware implementation issues This volume bundles fourteen contributed chapters written by experts in the field and is suitable for a wide audience of scientists grad students and implementors alike Book Jacket *Data-Driven Mining, Learning and Analytics for Secured Smart Cities* Chinmay Chakraborty, Jerry Chun-Wei Lin, Mamoun Alazab, 2021-04-28 This book provides information on data driven infrastructure design analytical approaches and technological solutions with case studies for smart cities This book aims to attract works on multidisciplinary research spanning across the computer science and engineering environmental studies services urban planning and development social sciences and industrial engineering on technologies case studies novel approaches and visionary ideas related to data driven innovative solutions and big data powered applications to cope with the real world challenges for building smart cities *Guide to Pairing-Based Cryptography* Nadia El Mrabet, Marc Joye, 2017-01-06 This book is devoted to efficient pairing computations and implementations useful tools for cryptographers working on topics like identity based cryptography and the simplification of existing protocols like signature schemes As well as exploring the basic mathematical background of finite fields and elliptic curves *Guide to Pairing Based Cryptography* offers an overview of the most recent developments in optimizations for pairing implementation Each chapter includes a presentation of the problem it discusses the mathematical formulation a discussion of implementation issues solutions accompanied by code or pseudocode several numerical results and references to further reading and notes Intended as a self contained handbook this book is an invaluable resource for computer scientists applied mathematicians and security professionals interested in cryptography

Real-World Electronic Voting Feng Hao,Peter Y. A. Ryan,2016-11-30 Real World Electronic Voting Design Analysis and Deployment captures all major developments in electronic voting since 2003 in a real world setting It covers three broad categories e voting protocols attacks reported on e voting and new developments on the use of e voting This book explores recent innovations in both poll site and remote voting systems and their application throughout the world The requirements of elections are analysed the available tools and technologies are described and a variety of modern systems are presented in detail together with discussions of deployments This is an invaluable resource for election professionals researchers and policy makers alike Key Features Reviews both technical and social aspects of e voting Covers e voting protocols attacks reported on e voting and new developments on the use of e voting Designed for government election practitioners and policy makers who want to understand the threats and opportunities in e voting and assess its suitability for future elections

Security Infrastructure Technology for Integrated Utilization of Big Data Atsuko Miyaji,Tomoaki Mimoto,2020-04-23 This open access book describes the technologies needed to construct a secure big data infrastructure that connects data owners analytical institutions and user institutions in a circle of trust It begins by discussing the most relevant technical issues involved in creating safe and privacy preserving big data distribution platforms and especially focuses on cryptographic primitives and privacy preserving techniques which are essential prerequisites The book also covers elliptic curve cryptosystems which offer compact public key cryptosystems and LWE based cryptosystems which are a type of post quantum cryptosystem Since big data distribution platforms require appropriate data handling the book also describes a privacy preserving data integration protocol and privacy preserving classification protocol for secure computation Furthermore it introduces an anonymization technique and privacy risk evaluation technique This book also describes the latest related findings in both the living safety and medical fields In the living safety field to prevent injuries occurring in everyday life it is necessary to analyze injury data find problems and implement suitable measures But most

cases don't include enough information for injury prevention because the necessary data is spread across multiple organizations and data integration is difficult from a security standpoint. This book introduces a system for solving this problem by applying a method for integrating distributed data securely and introduces applications concerning childhood injury at home and school injury. In the medical field, privacy protection and patient consent management are crucial for all research. The book describes a medical test bed for the secure collection and analysis of electronic medical records distributed among various medical institutions. The system promotes big data analysis of medical data with a cloud infrastructure and includes various security measures developed in our project to avoid privacy violations. **Progress in**

Progress in Cryptology - INDOCRYPT 2001 C.

Pandu Rangan, Cunsheng Ding, 2001-01-01. INDOCRYPT 2001 the Second Annual Crypto Conference is proof of the significant amount of enthusiasm generated among Indian as well as International crypto communities. INDOCRYPT 2001 was organized by the Indian Institute of Technology Madras and the Institute of Mathematical Sciences also located in Madras now Chennai. This event was enthusiastically co-sponsored by eAltraz Consulting Private Ltd Chennai, Odyssey Technologies Ltd Chennai and Shanmuga Arts Science Technology and Research Academy SASTRA Thiruvallur. The Program Committee Co-chair Prof C Pandu Rangan was responsible for local organization and registration. The Program Committee considered 77 papers and selected 31 papers for presentation. These papers were selected on the basis of perceived originality, quality, and relevance to the field of cryptography. The proceedings include the revised version of the accepted papers. Revisions were not checked as to their contents and authors bear full responsibility for the contents of their submissions. The selection of papers is a very challenging and demanding task. We wish to thank the Program Committee members who did an excellent job in reviewing the submissions in spite of severe time constraints imposed by the tight proceedings schedule. Each submission was reviewed by at least three referees, only a few by two. The Program Committee was ably assisted by a large number of reviewers in their area of expertise. The list of reviewers has been provided separately. Our thanks go to all of them. Annual Symposium on
