**Identifying Software Project Risks in the Canadian Financial Services Sector** John A. Estrella, 2007 Abstract

Summary Frequent occurrence of software project failures has created two general streams of research One theme analyzed the common causes of cost overruns late schedules and unmet scope With the belief that project failures are avoidable through proactive means another group of researchers investigated software project risks With such intent comparative studies were conducted in Finland Hong Kong and the United States Subsequent research in Nigeria determined the impact of the socioeconomic context To further extend the coverage of prior studies the research in the current study focused specifically on the Canadian financial services sector Project managers were solicited for input to discover determine and rank risk factors in software projects using the same research design that was used in previous comparative research studies a three phase Delphi survey that uses nonparametric statistical techniques In sharp contrast to prior studies however this research aimed not for general applications of the results at the country level but for specific collective relevance to software projects in banks trust companies insurance companies mutual fund companies and similar organizations The composite rankings of the studies in Hong Kong Finland and the United States listed lack of management commitment inability to get user commitment and misunderstanding of the requirements as the top three risk items in software projects Given that only the misunderstanding of requirements made it into the top three risk items in Nigeria it would be of value to scholars and practitioners to determine how the results would differ if the study was conducted in a specific sector in the industry Except for one risk factor lack of dedicated full time project resources this study confirmed that the previous list of risk factors captured the top risk factors in the Canadian financial services sector

**Next-Generation Enterprise Security and Governance** Mohiuddin Ahmed,Nour Moustafa,Abu Barkat,Paul Haskell-Dowland,2022-04-19 The Internet is making our daily lives as digital as possible and this new era is called the Internet of Everything IoE The key force behind the rapid growth of the Internet is the technological advancement of enterprises The digital world we live in is facilitated by these enterprises advances and business intelligence These enterprises need to deal with gazillions of bytes of data and in today s age of General Data Protection Regulation enterprises are required to ensure privacy and security of large scale data collections However the increased connectivity and devices used to facilitate IoE are continually creating more room for cybercriminals to find vulnerabilities in enterprise systems and flaws in their corporate governance Ensuring cybersecurity and corporate governance for enterprises should not be an afterthought or present a huge challenge In recent times the complex diversity of cyber attacks has been skyrocketing and zero day attacks such as ransomware botnet and telecommunication attacks are happening more frequently than before New hacking strategies would easily bypass existing enterprise security and governance platforms using advanced persistent threats For example in 2020 the Toll Group firm was exploited by a new crypto attack family for violating its data privacy where an advanced ransomware technique was launched to exploit the corporation and request a huge figure of monetary ransom Even after applying rational governance hygiene cybersecurity configuration and software updates are often overlooked when they are most needed to fight cyber crime and

ensure data privacy Therefore the threat landscape in the context of enterprises has become wider and far more challenging There is a clear need for collaborative work throughout the entire value chain of this network In this context this book addresses the cybersecurity and cooperate governance challenges associated with enterprises which will provide a bigger picture of the concepts intelligent techniques practices and open research directions in this area This book serves as a single source of reference for acquiring the knowledge on the technology process and people involved in next generation privacy and security
