

PATTERN AND PROBLEM SOLVING LABORATORY KIT G

CONTENTS: 12 Task Cards
12 Black Line Masters

The skills involved in Kit G are those involved in "slides" or translations and turns or rotations. The slides also require interpretations from a smaller pattern to a larger pattern.

Rotations include quarter, half, and three-quarter turns.

Task cards 1-3 have students construct a design with Unifix cubes from a smaller pattern. Careful attention to color and pattern are essential to correctly interpret the pattern onto the larger grid.

Task Cards 4-6 involve color-matching Unifix cubes to the pattern on one-half of the grid and then making a half-turn (180°) and repeating the pattern. The student must make a half-turn mentally in order to determine what color cube is to be placed into which position.

Task Card 7 has the student color match one arm of the figure with the correct Unifix cubes. This arm is then rotated one-quarter, one-half, and three-quarter turns to complete the pattern. The remaining task cards use this same form of activity.

The black line masters can be used by students to build their own designs and then either sliding the design down as in the first three task cards or rotating it as is done in the last nine. The black line master for Task Card 12 is especially appropriate for original design work. One quadrant of the design is used to build a pattern which may use some or all of the squares in that area. This design is then rotated through 90° , 180° , and 270° . The exercise is made challenging and interesting by using "arms" as in Task Card 7 rather than all of the spaces in the quadrant. Records of these designs can be created by coloring in the squares to match the color of the cubes.

Together, Kits F and G provide basic experience in the three possible motions in motion geometry: reflections (flips), rotations (turns), and translations (slides). The experience with these motions in the early grades helps to build the foundation for later work in motion geometry.
