Semantic Web Services Rudi Studer,Stephan Grimm,Andreas Abecker,2007-05-23 In just a few years service oriented architectures SOA and Web services not only gained considerable interest in computer science research they were also taken up with unanimity by all major international players in the IT industry However and in spite of all existing standards in most SOA applications much human intervention is still required for example to interpret the semantics of informal descriptions or to harmonize incompatible data schemata Semantic Web services combine Web services communication technology with the intelligent processing of ontology based metadata to achieve highly integrated enterprise application integration scenarios for service look up schema matching or protocol negotiation for example Rudi Studer and his team deliver a self contained compendium about this exciting field starting with the basic standards and technologies and also including advanced applications in eGovernment and eHealth The contributions provide both the theoretical background and the practical knowledge necessary to understand the essential ideas and to design new cutting edge applications They address computer science students as well as researchers in academia and industry who need a concise introduction and state of the art survey of current research and the book can easily be used as the basis of a specialized course on Web services or Semantic Web applications In addition IT professionals will be able to assess the potential and possible benefits of this new technology

Semantic Web Services Rudi Studer,Stephan Grimm,Andreas Abecker,2010-10-15 In this volume Rudi Studer and his team deliver a self contained compendium about the exciting field of Semantic Web services starting with the basic standards and technologies and also including advanced applications in eGovernment and eHealth The contributions provide both the theoretical background and the practical knowledge necessary to understand the essential ideas and to design new cutting edge applications

Introduction to the Semantic Web Gabriel P. C. Fung,2011-04-20 According to W3C the Semantic Web is a web of data that enables machines to understand the meaning semantics of the data information presented in the World Wide Web It extends the network of hyperlinked human readable web pages by inserting machine readable metadata about pages and how they are related to each other enabling automated agents to access the Web more intelligently and perform tasks on behalf of users With more research about semantic web in research organizations and in industry the Semantic Web is quickly emerging as a well recognized and important area of computer
