Crumpton, 2014-10-02 This book is about Black women s search for relationships and encounters that support healing from intimate and cultural violence Narratives provide an ethnographic snapshot of this violence while raising concerns over whether or not existing paradigms for pastoral care and counseling are congruent with how many Black women approach healing **Intimate Japan** Allison Alexy, Emma E. Cook, 2019-01-31 How do couples build intimacy in an era that valorizes independence and self responsibility How can a man be a good husband when full time jobs are scarce How can unmarried women find fulfillment and recognition outside of normative relationships How can a person express their sexuality when there is no terminology that feels right In contemporary Japan broad social transformations are reflected and refracted in changing intimate relationships As the Japanese population ages the low birth rate shrinks the population and decades of recession radically restructure labor markets Japanese intimate relationships norms and ideals are concurrently shifting This volume explores a broad range of intimate practices in Japan in the first decades of the 2000s to trace how social change is becoming manifest through deeply personal choices From young people making decisions about birth control to spouses

struggling to connect with each other parents worrying about stigma faced by their adopted children and queer people creating new terms to express their identifications Japanese intimacies are commanding a surprising amount of attention both within and beyond Japan With ethnographic analysis focused on how intimacy is imagined enacted and discussed the volume s chapters offer rich and complex portraits of how people balance personal desires with feasible possibilities and shifting social norms Intimate Japan will appeal to scholars and students in anthropology and Japanese or Asian studies particularly those focusing on gender kinship sexuality and labor policy The book will also be of interest to researchers across social science subject areas including sociology political science and psychology

Fragmented Intimacy Peter J. Adams, 2007-12-20 I recall during my early years as a clinical psychologist being asked by hospital staff to speak with a 32 year old man addicted to alcohol who was being discharged following treatment for pancreatitis This had been his third admission for the same illness and hospital practitioners were exasperated by his choice to continue drinking despite being repeatedly told it would cause irreparable damage to his pancreas from which he would be unlikely to survive I met him in a side room on the ward He sat in his pyjamas in the corner of the room thin and ashen looking with a worried frown fixed across his face Our conversation was initially stilted and I was trying hard not to replicate the lectures and sermons he was likely to have already received from hospital staff As we talked I was able to piece together bits of information about his current circumstances he lived alone he was unemployed and his only family contact was with a brother who visited to check on him occasionally He started to relax into the conversation and then talked about his long struggles with alcohol his drinking had begun in his early teens it had provided him with confidence and friendships he had had some serious motor vehicle accidents he had tried to stop drinking but soon continued he had lost friends jobs and family relationships and in response he had increasingly sought intoxication as a refuge
