

Some Practice Problems for the Java Exam and Solutions for the Problems

The problems below are *not* intended to teach you how to program in Java. You should not attempt them until you believe you have mastered all the topics on the "Checklist" in the document entitled "C101 Java Study Guide".

There are 40 problems. The solutions for the problems are given at the end, after the statement of problem 40.

In all these problems, we'll assume that the following has been done in the appropriate places:

```
import java.util.Scanner;
Scanner scan = new Scanner(System.in);
```

1. What is the exact output of the program below. Indicate a blank line in the output by writing blank line.

```
public static void main(String[] args)
{
    int n = 4, k = 2;

    System.out.println(++n );
    System.out.println( n );

    System.out.println( n++ );
    System.out.println( n );

    System.out.println( -n );
    System.out.println( n );          ...

    System.out.println( --n );
    System.out.println( n );

    System.out.println( n-- );        ...
    System.out.println( n );

    System.out.println( n + k );      ...
    System.out.println( n );
    System.out.println( k );          ...
    System.out.println(" " + n + " " + k ); ...

    System.out.println( n );          ...
    System.out.println( " " + n );    ...
    System.out.println( " n" );       ...
