The quest to evolve bibliographic control to an equal or greater standing within the current information environment is on going As information organizers we are working in a time where information and communication technology ICT has pushed our status quo to its limits and where innovation often needs the pressure of do or die in order to get started The year 2010 was designated as the Year of Cataloging Research and we made progress on studying the challenges facing metadata and information organization practices However one year of research is merely a drop in the bucket especially given the results of the Resource and Description and Access RDA National Test and the Library of Congress decision to investigate the possibility of transitioning the MARC21 format This book addresses how information professionals can create a functional environment in which we move beyond just representing information resources and into an environment that both represents and connects at a deeper level Most importantly it offers insight on transitioning into new communities of practice and awareness by reassessing our purpose re charting our efforts reasserting our expertise in the areas that information organizer have traditionally claimed but are losing due to stagnation and lack of vision This book was published as a double special issue of the Journal of Library Metadata      *The California RDA Written Examination Prep Book* Colleen Kirby-Banas, Foundation for Allied Dental Education, 2013-01-01      *Journal of the American Dietetic Association*, 1993      *California rda exam pathway 2025/2026 version* Brittany Deaton, 2025-08-08
