50 Essays Samuel Cohen, 2022-10-11      **50 Essays** Samuel Cohen, 2010-09-17 *50 Essays A Portable Anthology* is the best selling value priced reader in the country because its virtues don't stop at the price. Its carefully chosen selections include enough classic essays to reassure instructors and enough high interest and high quality contemporary readings to keep things lively and relevant for students. The editorial apparatus is more extensive than in competing value readers but still is flexible and unobtrusive enough to support a variety of approaches to teaching composition. In its third edition *50 Essays* continues to offer selections that instructors enjoy teaching at a price students won't resist but with more editorial emphasis than before on the critical thinking and academic writing skills of today's composition courses.      **Substance, Judgment, and Evaluation** Patrick T. Flynn, Jean-Marie Kauth, John Kevin Doyle, Scott J. Lee, 2010-06-10 *Substance Judgment and Evaluation Seeking the Worth of a Liberal Arts Core Text* Education selectively presents the thoughts of scholars and teachers of liberal arts core text education on how their programs formulate and advance a value centered education. What emerges from this selection is the wide scope of core text programs underlying the semantic intention of words such as value centered judgment or even liberal arts or collegiate and colleague. This volume records the cooperation and thoughtful consideration of faculty from a wide range of higher education institutions: research universities, comprehensive universities, colleges, and community colleges who have chosen to come together to form such programs across North America. This volume should be of value to any dean, director, or faculty member who seeks to work with colleagues and texts across disciplines to form a coherent undergraduate program of study within general education.

**Periodical Essay in Modernity** R. Eric Tippin, 2025-03-31 This book takes seriously the late Victorian periodical essay, treating it with the same formal care that another study might give to Thomas Hardy's poetry or Henry James's prose. It also attends to the essay's periodical context: advertisements, news, serial publication, material transience, and burying ubiquity. It challenges the distinction between serious literature and mere articles that appear in dailies, weeklies, and monthlies. And then it argues that to understand the periodical essay between 1880 and 1920 is to understand the transitions of that period more clearly: from belief to doubt, from country to city, from thick time to clock time. The periodical essay is implicated in all these transitions. In making this argument, this book makes special reference to three authors: Oscar Wilde, G. K. Chesterton, and Virginia Woolf. All three command very different audiences, and this book suggests an association between the three as periodical essayists.

Lawrence,2015-09-04 How does an introverted student with a visual or auditory learning preference find success in a classroom built for extroverted kinesthetic learners While student discussion in the classroom is invaluable it also presents an issue for many students not only in how they feel in the class setting but in how they ultimately learn Given the emerging understanding of differing personality types and learning preference it is questionable whether all students are served by socially active methods that mandate students to speak Learning and Personality documents how introverted and intrapersonal students are being subjected to uncomfortable situations in schools today This book focuses on the classroom experience of students who have been identified as learning best through reflection and observation The author uses an American college writing class as the setting to explore the in depth experience of common first year students The results of this primary qualitative study reveal a glaring conflict within mainstream educational theory With more than five years of research and over one hundred references cited from sources that span two centuries this book calls attention to a mass misunderstanding of introversion as well as the effects of instructional methods that appeal to only one type of personality
