Nothing: A Very Short Introduction Frank Close, 2009-06-25 What is the void What remains when you take all the matter away Can empty space nothing exist This text explores the science history of the elusive void from Aristotle's theories to black holes quantum particles why our very latest discoveries about the vacuum can tell us extraordinary things about the cosmos

**An Anthropology of Nothing in Particular** Martin Demant Frederiksen, 2018-08-31 There have been claims that meaninglessness has become epidemic in the contemporary world One perceived consequence of this is that people increasingly turn against both society and the political establishment with little concern for the content or lack of content that might follow Most often encounters with meaninglessness and nothingness are seen as troubling Meaning is generally seen as being a cornerstone of the human condition as that which we strive towards This was famously explored by Viktor Frankl in *Man's Search for Meaning* in which he showed how even in the direst of situations individuals will often seek to find a purpose in life But what then is at stake when groups of people negate this position What exactly goes on inside this apparent turn towards nothing in the engagement with meaninglessness And what happens if we take the meaningless seriously as an empirical fact

**The Calculus Story** David Acheson, 2017 Acheson introduces the fundamental ideas of calculus through the story of how the subject developed from approximating to imaginary numbers and from Newton's falling apple to the vibrations of an electric guitar Back cover

*Architecture* Martin van der Linden, 2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic

*Nothing So Absurd* Phillip Hoffmann, 2003-09-02 Written in clear non technical language *Nothing So Absurd* is a succinct and accessible introduction to topics in the history of Western philosophy In seven concise chapters the author introduces the reader to the central topics within the discipline In some cases such as metaphysics and epistemology he adopts a historical approach while in others such as ethics and philosophy of religion the focus is as much on contemporary issues as it is on historical developments In each area he presents material of great intrinsic interest in a fashion that also provides a sense of the broad sweep of the discipline This book provides a fair minded exposition of a wide range of viewpoints throughout and dwells in its final chapter on the virtues of philosophical realism thus presenting the reader with the opportunity to engage with a direct philosophical argument A guide to further reading will assist readers new

to philosophy From Something to Nothing Harry Fox, Daniel Maoz, Tirzah Meacham, 2019-05-24 Jewish mysticism approaches God as no thing or nothing reflecting Judaism's traditional identification of God as incorporeal Whereas technical philosophical language often employed to discuss Jewish mysticism has a tendency to ward off otherwise interested readers this study sufficiently breaks down the technical language of Jewish mysticism in its various expressions to allow a beginner to benefit from what may otherwise be indescribable and only approached by consideration of what is not rather than what is Integral to the title From Something to Nothing is the concept that God cannot be something because that would be restricting so God is simply no thing Ironically the conventional religious expression for the biblical notion of creation is something from nothing whereas the title of this volume is its precise opposite which may at first seem to be illogical creation in reverse However in a volume dedicated to various deliberations on magic and mysticism the ultimate reality may receive expression as nothingness that is no thingness no quality associated with things What adds to our difficulty today is that nothingness is inextricably linked with silence Is silence also an element or indication of an ultimate reality or its absence Or is it merely the reflection of nothing whatsoever This is at the heart of modern debates between atheists and believers Believers feel that even this silence speaks to this ultimate reality whereas atheists claim that if you cannot show it then you do not know it In other words believers are victims of their own wishful thinking From Something to Nothing memorializes Canadian mystic and scholar Zalman Schachter Shalomi's engaging in particular aspects that he addressed at some phase of his colourful and erudite life providing the reader with a broad spectrum of both phenomenological and intellectual topics

**The Scientific Truth, the Whole Truth and Nothing but the Truth** John R. Helliwell, 2024-04-05 There is a limited understanding amongst scientists students and the public about realizing trust in scientific findings This should be a paramount objective Scientists and the public need to know more about the link between the philosophy of science and science research methods There is a limited understanding of why accuracy is important and that it is not the same as precision Also there is often the need to be pragmatic and so measure an approximation of a real system and the classic case is reductionism in biology versus whole organism biology The author brings these topics together in terms of trusting in science Features Covers how scientific truth is perceived and increases the preparedness of early career scientists Examines the relatively new field of machine learning and artificial intelligence as applied to crystallography databases in biology and chemistry for new discoveries Describes the major changes in digital data archiving and how vast raw data archives are being increasingly developed for machine learning and artificial intelligence as well as complete truth This unique volume will be of interest to pre university and university undergraduate students principally in science Presents scientific research examples from physics chemistry and biology together with their methodologies **The Economist**, 2009 **Lippincott's Magazine of Popular Literature and Science**, 1874 **Lippincott's Magazine of Literature, Science and Education**, 1874 On this Side Nothing Alex Comfort, 1949 The Nation, 1913 **The Old-spelling Shakespeare: Much adoe**
