Educational Policy Evaluation through International Comparative Assessments Rolf Strietholt,Wilfried Bos,Jan-Eric  
Gustafsson,Monica Rosén,2014 One of the most salient findings from the field of education is that there are huge national  
differences in student achievement as shown in international comparative studies like PISA and TIMSS The shockingly large  
gap between the highest performing countries mostly in East Asia and many European countries corresponds to a difference  
in attainment of two years of schooling Although this finding has been replicated in several studies the reasons for and  
consequences of such differences are currently not well understood This book is a collection of essays and studies by leading  
experts in international comparative education who demonstrate how international comparative assessments can be used to  
evaluate educational policies The volume is organized into two parts that address first theoretical foundations and  
methodological developments in the field of international assessments and second innovative substantive studies that utilize  
international data for policy evaluation studies The intention of this book is to revisit the idea of using the world as an  
educational laboratory both to inform policy and to facilitate theory development *Erosion of the Property Tax Base* Nancy  
Y. Augustine,2009 Increased reliance on residential property to generate tax revenue and soaring property values in many  
parts of the country have placed pressure on local officials to respond to concerns about higher property taxes The result has  
been erosion of the property tax base through a variety of policies designed to relieve residential property tax burdens  
through exemptions or abatements The chapters in this book provide analyses of recent property tax trends examine several  
responses to the increasing importance of residential property estimate the extent of property tax base erosion and its effects  
and consider other related topics The erosion of the property tax base raises serious concerns about the future health of our  
federal system of government and the continued ability of local governments to protect what de Tocqueville called America s  
passion for popular sovereignty This book is a result of the ongoing collaboration between the Lincoln Institute of Land Policy  
and the George Washington Institute of Public Policy presents the findings from the 2007 inaugural Property Tax Roundtable  
*Microeconomics* Thomas J. Nechyba,2011 **Microeconomics** Thomas J. Nechyba,2017 **Public Finance in Theory  
and Practice Second edition** Holley Ulbrich,2013-03-01 The events of the last decade have challenged the contemporary  
neo classical synthesis in all branches of economics but particularly public finance The most notable feature of the 2nd  
edition of Public Finance in Theory and Practice is the infusion of behavioral economics throughout the text with an end of  
chapter question inviting the student to apply a behavioral lens to some question or issue There continues to be an emphasis  
on the importance of the institutional context drawing on examples from many countries and emphasizing the role of lower  
level governments in a federal system The first five chapters establish this context by reviewing the role of government in a  
market system the description of government structure from an economic perspective the basic data about revenue and

expenditures the elements of public choice and the distributional role of government The book has been substantially reorganized to put more emphasis on public expenditure Expanded treatment of public goods includes common property resources and congestible or club goods Expanded discussion of budgeting and cost benefit analysis provides some practical application of the theory Updated discussions of social security public education and health care address these three major contemporary public finance issues The traditional emphasis on revenue taxes fees and grants has been retained but follows rather than precedes the discussion of expenditures
