Moving Math Mary Fiore, Maria Luisa Lebar, 2017-10-17 Focus on moving the teaching and learning of mathematics by shifting instruction and assessment practices This unique book uses critical thinking skills inferring and interpreting analyzing evaluating making connections synthesizing reasoning and proving and reflecting to help students make sense of mathematical concepts and support numeracy

Democracy's Midwife Jack Crittenden, 2002-01-01 The philosopher educator John Dewey wrote that Democracy has to be born anew every generation and education is its midwife In an America where every vote though considered equally counts for very little Democracy's Midwife offers the vision of a new kind of democratic system a deliberative democracy energized by an educated citizenry Jack Crittenden's excellent new study looks behind the modern democratic rhetoric to reveal a system of government that excludes citizens from participating directly in decision making The book combines a thorough examination of the theoretical underpinnings of democratic education with radical solutions for the overhaul of a system of civic education dating back to the Founding Fathers Democracy's Midwife is both a denunciation of an education system that has failed to prepare future citizens for participation in public life and a timely blueprint for the creation of a civic minded electorate prepared for the responsibility of self government

[Transform Your Math Class Using Asset-Based Teaching for Grades 6-12](#) Michael D. Steele, Joleigh Honey, 2024-07-30 Foster a love of mathematics by creating a more inclusive and empowering learning environment through asset based teaching An asset based perspective on math education means starting with what students already know instead of focusing on what's missing This approach elevates student thinking and reasoning skills In this way educators acknowledge that all students bring prior experiences strengths talents and resources to the learning process and can contribute meaningfully in an authentic learning environment Transform Your Math Class Using Asset Based Teaching for Grades 6 12 provides insight into asset based perspectives in mathematics education to create an environment where all students feel valued and capable of being doers of mathematics In the book Michael Steele and Joleigh Honey highlight the importance of using language instructional routines and systemic structure that positively impact student engagement their math identity and ultimately their outcomes Providing a wealth of knowledge and practical strategies that can be used to transform math classrooms into inclusive supportive and empowering learning environments this book Introduces an asset based perspective that focuses on students strengths assets and potential to learn mathematics Includes a variety of frameworks and tools that teachers can use to build and grow their sense of asset based perspectives Offers strategies for promoting a growth mindset in mathematics encouraging productive struggle in math and promoting equitable math instruction Supports teachers in reflecting on their decisions self awareness and self management Includes a companion online study guide to support teachers individually or as part of a professional learning community Adopting asset based perspectives is about movement over time not about flipping a switch This book paves the path for an asset based journey that ultimately helps to transform our math classrooms and

advance all students learning and development

The Four Roles of the Numerate Learner Mary Fiore, Maria Luisa Lebar, 2016-03-14 This timely book builds on our current understanding of how to effectively teach mathematics and borrows from the successful frameworks used to teach literacy It introduces a numeracy framework sense maker skill user thought communicator and critical interpreter that supports an integrated approach to math instruction It considers the mathematical practices students need to learn to construct number knowledge become mathematicians and simply do math The goal is to provide multiple entry points into the world of math instruction a new way of thinking and learning where learners engage in critical thinking about numeracy and act on their knowledge

Thinking Through Mathematics Edward A. Silver, Jeremy Kilpatrick, Beth Schlesinger, Dennie Wolf, 1990 This document focuses on how mathematics teaching and learning can be improved by developing more powerful approaches to connect thinking and mathematics It proposes changing perspectives on what it means to learn and do mathematics and explores how these perspectives can be incorporated into the teaching of secondary school mathematics Chapter 1 offers a view of mathematics as emerging largely from individual and social activity rather than from textbooks worksheets and tradition The learner is depicted as someone who actively constructs meaning instead of passively receiving it Chapter 2 considers how a greater emphasis on communication discussion debate recording and writing stimulates and uncovers students learning and thinking and leads to a deeper understanding by both teachers and students Chapter 3 explores how teachers might encourage greater inquiry and communication in a secondary school class by making minor but thought provoking changes in ordinary problems and situations Finally chapter 4 gives some practical advice on transforming the mathematics classroom into a place where students are expected not only to absorb and consume mathematics but also to produce and think about it Contains 17 references and 17 figures MKR

Bad at Math? Lidia Gonzalez,2023-02-03 Math really is for everyone so let s prove it You ve heard it from kids from friends and from celebrities I m bad at math It s a line that society tends to accept without examination after all some people just aren t math people right Wrong As we do with other essential skills we need to expose the stereotypes challenge the negative mindsets and finally confront the systemic opportunity gaps in math education and replace them with a new vision for what math is who it s for and who can excel at it In this book you ll find Research on teacher and student mindsets and their effect on student achievement Audience specific and differentiated tools reflection questions and suggested actions for educators at all levels of the system Examples from popular media as well as personal stories and anecdotes Quotes data driven figures and suggestions for deeper learning on all aspects of a positive and equitable vision of math education Both social commentary and a toolkit of solutions this bold new book directly challenges the constructs that have historically dictated our perceptions of what makes someone a math person Only by dismantling those misplaced assumptions can we reform math education so it works for everyone Because in truth we are all math people
