Red Desert Back Home:

Red Desert - Back Home Rita Carla Francesca Monticelli, 2015-07-31 They've succeeded in escaping and are going back home. But they aren't alone. Now that the adventure on Mars is over, what will become of Earth? The final book in the science fiction series *Red Desert*. Earth is their home; they were born and raised there, but at the same time, they've never set foot there. And so the deep feelings that Anna and Hassan have as they return to their own planet after almost five years are mixed with the marvel of the foreign entity they bring with them as it lands on a new world. The two survivors of the Isis mission are welcomed as heroes, but they can't enjoy the adulation. The intent they are pursuing has priority over everything else. Besides the internal battle between the new Anna and the old, two more conflicts consume her: the one against the hidden dangers brought by Earth itself, not to mention its inhabitants, and a more complex one involving her own feelings, which will force her to make an important choice affecting her future. In the meantime, on the Red Planet, Melissa finds herself deepening her exploration of human nature, torn between dread and disdain against it and a growing sense of belonging. But someone intrigued by the sudden acceleration of the whole Isis program is beginning to have suspicions. Now that the adventure on Mars is over, what will Anna's choice be? What will become of Earth? The previous books are *Red Desert Point of No Return* book 1, *Red Desert People of Mars* book 2, *Red Desert Invisible Enemy* book 3. Follow Anna Persson.

This book is written in British English. *Red Desert* Annie Proulx, 2012-07-25 A photographic and multidisciplinary study of one of America's last undeveloped and most endangered landscapes, edited by a Pulitzer Prize-winning author. A vast expanse of rock formations, sand dunes, and sagebrush in central and southwest

Wyoming the little known Red Desert is one of the last undeveloped landscapes in the United States as well as one of the most endangered. It is a last refuge for many species of wildlife. Sitting atop one of North America's largest untapped reservoirs of natural gas, the Red Desert is a magnet for energy producers who are damaging its complex and fragile ecosystem in a headlong race to open a new domestic source of energy and reap the profits. To capture and preserve what makes the Red Desert both valuable and scientifically and historically interesting, writer Annie Proulx and photographer Martin Stupich enlisted a team of scientists and scholars to join them in exploring the Red Desert through many disciplines: geology, hydrology, paleontology, ornithology, zoology, entomology, botany, climatology, anthropology, archaeology, sociology, and history. Their essays reveal many fascinating, often previously unknown facts about the Red Desert, everything from the rich pocket habitats that support an amazing diversity of life to engrossing stories of the transcontinental migrations that began in prehistory and continue today on I 80, which bisects the Red Desert. Complemented by Martin Stupich's photo essay, which portrays both the beauty and the devastation that characterize the region today, Red Desert bears eloquent witness to a unique landscape in its final years as a wild place.
