Endangered City Austin Zeiderman, 2016-05-19 Security and risk have become central to how cities are planned built governed and inhabited in the twenty first century In *Endangered City* Austin Zeiderman focuses on this new political imperative to govern the present in anticipation of future harm Through ethnographic fieldwork and archival research in Bogot Colombia he examines how state actors work to protect the lives of poor and vulnerable citizens from a range of threats including environmental hazards and urban violence By following both the governmental agencies charged with this mandate and the subjects governed by it *Endangered City* reveals what happens when logics of endangerment shape the terrain of political engagement between citizens and the state The self built settlements of Bogot s urban periphery prove a critical site from which to examine the rising effect of security and risk on contemporary cities and urban life
