

## Performance Task in Quadratic Equation

Directions: Read and understand the situation below then answer or perform what is asked.

Mr. Ipac was asked by his principal to transfer his Grade 9 class to a new classroom that was recently built. The room, however, still does not have fixtures such as teacher's table, bulletin boards, bookshelves, and cabinets. To help him acquire these fixtures, he informed the parents of his students about these classroom needs. The parents decided to donate construction materials such as wood, plywood, nails, paints and many others.

After all the materials have been received, he asked his students to make the designs of the different classroom needs. Each group of students was assigned to do the design of a particular fixture. The designs that the students will prepare shall be used by the carpenter in constructing the tables, chairs, bulletin boards, bookshelves, and cabinets.

1. Suppose you are one of the students of Mr. Ipac, how will you prepare the design of one of the fixtures?
2. Make a design of the fixture assigned to your group.
3. Illustrate every part or portion of the fixture including its measurements.
4. Using the design of the fixture made, determine all the mathematics concepts or principles involved in drafting the design.
5. Formulate problems involving these mathematics concepts or principles.
6. Write the expression, equations, or inequalities that describe the situations or problems.
7. Solve the equations, the inequalities, and the problems formulated.
8. You will be grouped having five (5) members each.
