A buddy check is normally thought of as an informal verification technique in which the life-cycle work product is examined by the author and one other person. The objectives of buddy checks include:

- Improve the life-cycle work product;
- Consider alternative implementations;
- Exchange techniques and style variations;
- Point out problems with clarity and understandability;
- Allow the author to look at the life-cycle work product from a different "angle" or point of view;
- Mentoring of others in the concepts embedded in the life-cycle work product. -

ANSWER What is a buddy check?

Circulation reviews take on attributes of both buddy checks and walkthroughs. Circulation reviews can be informal or follow strict rules. The life-cycle work product is circulated to each reviewer who reviews it and either attaches comments, questions, and recommendations directly on the life-cycle work product or places them into a separate document. The objectives of circulation reviews include:

- Improve the life-cycle work product;
- Consider alternative implementations;
- Point out problems with clarity and understandability;
- Point out areas of concern and offer comments and suggestions;
- Gain consensus from a large population of reviewers;
- Gain input from valuable contributors who cannot be present for a face-to-face review. -

ANSWER What is a circulation review?
