

Text Leveling Correlation Guide

Grades K-6

Because every reader is different, teachers often use a system of leveled books to match their students with just-right books. There are many systems and methods for leveling books and finding those books may differ among the various reading programs. This chart is designed to assist teachers in correlating the reading levels across the different reading systems. The chart approximates how these levels correlate to each other and to school levels. This leveling correlation is presented for general purposes only. Teachers are encouraged to adjust this correlation according to their personal evaluation and professional judgment.
