Executive Thinking Kevin Baize OD, Morris Graham PhD, 2011-02-18 Life is about how much we think Thinking is about how much mental capacity we possess Capacity in addition to our abilities and conscientiousness is about how much we can process combinations of verbal height quantitative width and spatial depth with decisiveness direction and speed No matter where we go or what we do as executives we take our thinking with us That may spoil everything because to a great extent we do and accomplish what we think about Our thoughts mold our aspirations attitudes and accomplishments during our life In other words our careers and lives are influenced more by the power of our thoughts than anything else The bad news is that most of us never fully use our mental capacities and never achieve our potential The good news is that neural technologies are now available to transform our thinking into the higher realms of brilliance Developing the spatial capacity to think higher wider and deeper means breaking away from the effects of years of flat thinking or educational backgrounds that stifles creative innovative potential Expand your mental agility through a development of higher order processes and discover a whole new world mentally in Executive Thinking

Improving the Odds Rodney Larson, 2009-11-16 Improving the Odds Raising the Class is a book aimed at legislators school administrators home school advocates and college and university professors which examines the education system and provides a paradigm for improvement The aim of this book is to find simple ways to approach improving the school system in America based on a belief that we need to build a system that has improvement built into the process of training and educating both teacher and students Despite an extensive management structure that exists for K 12 education most restructuring efforts do not result in better delivery of information at the classroom level Teachers and site administrators receive little help from the current management structure in improving the product delivered to kids at the classroom level This book calls for a restructuring of education systems in order to remove redundant and unnecessary functions and to take advantage of economies of scale
