Nice Higher Education Society Joseph Devitis:

The Future of American Higher Education Joseph L. DeVitis, 2023-07-03 This impressive anthology presents the reader with an introduction to a gallery of public intellectuals through the critical eyes of a wide array of contributing writers from various academic fields Both the latter and the public intellectuals themselves are responding to the state of American higher education Importantly most of them there are a few public intellectuals in the book who cling closer to the status quo do not separate colleges and universities from the political economic and social currents of American society They attack the realities of growing social inequality the intractable presence of institutional racism and the recurrent reliance on the free market as the arbiter of value Public intellectuals assess the impact of these social factors on the organization and practices of contemporary American higher education They force the reader to consider serious challenges to the current arrangement of higher learning and as such they ask us to assess the efficacy of their respective perspectives Do they present the reader with insight or idealism pathways or dead ends This compendium provides an abundance of ideas for higher education leaders policy makers faculty members trustees and governmental officials as well as social theorists and graduate students interested in higher education careers Richard Guarasci President Emeritus of Wagner College Just as our society is polarized higher education is no less divided as to its mission and purpose whether it should be preparing students for employment or for engagement as citizens whether it should be corporatist and profit driven or promote intellectual curiosity and independent thinking and whether it should pursue a neoliberal agenda or promote a liberal education Whose scholarship culture and epistemologies should be validated Should it be a private or a public good Preserve tenure or erode it What role should colleges and universities play in addressing economic inequality and systemic racism The answers to these questions are critical for the future of our society as our universities and colleges are the nurseries of the values and philosophies that shape it The chapters in this book review the contributions of seventeen public intellectuals who have been at the forefront of these issues and significantly contributed to these debates Each describes the genesis of each scholar's ideas and presents and critiques his or her core insights and arguments The seventeen public intellectuals represent a spectrum of opinion from the conservative to the progressive At this pivotal moment when much of higher education is in economic crisis and public trust in it has been eroded this book offers a robust entry point for considering the options and directions ahead for anyone in a leadership position The book will also be valuable for higher education courses to stimulate debate about these critical issues and introduce readers to the seminal thinkers in the field Public Intellectuals Presented Stanley Aronowitz Michael B. The University Becoming Søren S. E. Bengtson, Sarah Robinson, Wesley Shumar, 2021-06-23 This volume wholeheartedly engages with the current climate in higher education and provides not only a thorough analysis of the foundational elements

constituting higher education but also a critical discussion of possible connections to societal and cultural domains and policy debates Today higher education institutions and programs are beset with multiple and often conflicting pressures and demands Higher education is regarded by societies in general and at the political level in particular as a pathway to securing continued economic growth and ensuring cultural growth in surrounding societal contexts Future academics are expected to become experts within their disciplines and at the same time to acquire and develop generic competences and transferable skills directly translatable into job market and professional contexts These conflicting and fragmented policy approaches to higher education leaves academic leaders teacher researchers and students with an incoherent curriculum and a confused and eroded academic identity and societal outlook Much literature within higher education research that engages with similar topics are dominated by a backwards looking and heavy critique of current political and educational conditions for the university and higher education This volume suggests a new tack that is defined by openness and optimism towards possibilities for a transformative higher education curriculum that at the same time stays firmly rooted within the foundational academic soil By drawing on and contributing to the emerging research field the philosophy and theory of higher education the book combines critique with a constructive and future oriented approach and outlook on higher education Further it combines and links philosophical discussions on the idea of the future university with societal responsibility and a curricular and formational awareness
