Stewart,2012-04-06 Alcohol is the leading cause of preventable birth defects and developmental disabilities in the United States Fetal alcohol syndrome is the most severe of these abnormalities and it is caused by heavy drinking during pregnancy While addiction may be one of the factors there are several factors as to why a woman would drink while pregnant but there is no measured amount of alcohol that is deemed safe during pregnancy This volume explores the causes of fetal alcohol syndrome and the spectrum of symptoms associated with it which can be physical and psychological and fall within a wide range of severity Author Gail B Stewart also discusses the difficulty in diagnosing the disease and what researchers teachers and caregivers are doing to try to improve the lives of people with Fetal alcohol syndrome **ADHD and Fetal Alcohol Spectrum Disorders (FASD)** Kieran D. Abel,2012-12-06 I have written this book because I felt there was a need to bring together in one place the vast amount of research that has been published in the past 10 years concerning alcohol s effects on the conceptus My hope is that this book will be of value to the many clinicians basic research scientists social workers and others who are interested in this important issue The number of such publications continues to grow each year and it was a very difficult task to review even a proportion of them completely While I have cited many of these research studies only those that in my very subjective

opinion warranted extended coverage were discussed In this regard much of my ask was facilitated by the many excellent reviews that have already been written To those whose important contributions have not been discussed or cited I offer my sincere apologies Omission of these publications in most cases reflects my own personal interests or awareness rather than merit
