Radical Change Daniel Sullivan,2015-12-04 We are emerging from an age of machines into an age of knowledge driven technologies that are reshaping our world creating a paradox of Winners and Losers Corporate profits are at an all time high and the very rich have not had it this good since the eve of 1929 But for the rest of America something has gone very wrong with the economy Wages have stagnated for decades inequality is at an historic level and the hopes of working families have all but evaporated Sadly we are witnessing the death of the American Dream No one seems to know why a surprising percentage of America does not yet seem very upset and many politicians economists and the one percenters are doing everything they can to ensure that nothing changes In laypersons terms *Radical Change The Death of the American Dream* describes the evolution of computer intelligence and the robotic capabilities it empowers As these technologies become smarter they will increasingly win the battle for middle income jobs continue to disrupt major industries and fundamentally alter the economic balance in our society Someday these technologies may even escape our control *Radical Change* Daniel Sullivan,2015

The American Dream and Contemporary Hollywood Cinema J. Emmett Winn,2007-09-26 While the myth of a classless America endures in the American Dream the very stratification that it denies unfairly affects the majority of Americans Study after study shows that it s increasingly difficult for working class people to achieve upward mobility in the US so how does the American Dream continue to thrive J Emmett Winn shows us that the American Dream s continued glorification in contemporary Hollywood cinema should not be ignored The book explicates three major themes surrounding the American Dream in contemporary Hollywood cinema and relates those findings to the United States social and cultural changes in the last 25 years Through his thoughtful analysis of films as diverse as *Working Girl Titanic Pretty Woman Flashdance The Firm Good Will Hunting Saturday Night Fever Wall Street* and many others Winn shows that contemporary Hollywood is very much in the business of keeping the Dream alive

The American Dream and American Cinema in the Age of Trump Graham S. Clarke,Ross Clarke,2022-07-28 *The American Dream and American Cinema in the Age of Trump* uses both film theory and insights from object relations theory in order to examine how recent films address and reflect the state of the American Dream This fascinating book looks at how the American Dream is one of the organising ideas of American cinema and one of the most influential cultural outputs of the twenty first century at a time of internal crisis In an era characterised by populism climate change and economic uncertainty the book considers nine auteur films in how they illustrate the challenges of contemporary America Graham S Clarke and Ross Clarke present a bifocal perspective on some of the most well received American films of recent years and how they relate to the American Dream in the context of the Trump presidency For each of the nine films discussed two different accounts are presented side by side so that each film is considered from an object relations psychoanalytic point of view internal world as well as a film and cultural theory perspective external world This unique approach is complemented by discussion of political and critical theory providing a

Anatomy of a Robot Despina Kakoudaki,2014-07-07 Why do we find artificial people fascinating Drawing from a rich fictional and cinematic tradition Anatomy of a Robot explores the political and textual implications of our perennial projections of humanity onto figures such as robots androids cyborgs and automata In an engaging sophisticated and accessible presentation Despina Kakoudaki argues that in their narrative and cultural deployment artificial people demarcate what it means to be human They perform this function by offering us a non human version of ourselves as a site of investigation Artificial people teach us that being human being a person or a self is a constant process and often a matter of legal philosophical and political struggle By analyzing a wide range of literary texts and films including episodes from Twilight Zone the fiction of Philip K Dick Kazuo Ishiguro's novel Never Let Me Go Metropolis The Golem Frankenstein The Terminator Iron Man Blade Runner and I Robot and going back to alchemy and to Aristotle's Physics and De Anima she tracks four foundational narrative elements in this centuries old discourse the fantasy of the artificial birth the fantasy of the mechanical body the tendency to represent artificial people as slaves and the interpretation of artificiality as an existential trope What unifies these investigations is the return of all four elements to the question of what constitutes the human This focused approach to the topic of the artificial constructed or mechanical person allows us to reconsider the creation of artificial life By focusing on their historical provenance and textual versatility Kakoudaki elucidates artificial people's main cultural function which is the political and existential negotiation of what it means to be a person     *Outlook* Alfred Emanuel Smith,Francis Walton,1879     *Rhetorical Criticism* Sonja K.
