## R 1200 CL

### Headlights

The four round headlights have been integrated in a new arrangement never before used on a BMW Motorcycle. The headlamps are mounted to an adjustable support made of a synthetic material.

They consist of two larger low beam headlights and two smaller high beam headlights positioned one on top of the other.

The low beam headlights work with an H4-light and can be readjusted from the front. The high beam headlights with H1-lights enable wide illumination of the road with their scattered light.

The park lamps with 4-watt conventional bulbs are installed in the low beam headlights. All electric light bulbs can be replaced from the outside after removing each inner trim.

The beam distance can be adjusted to compensate for two up riding with the spring-loaded lever located on left side of fairing rear surface. For normal position, lever is up, to adjust flip down (as shown).
