### Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges

Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications. The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets. These results suggested a worrisome possibility: the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic. In response, a series of international discussions on the nature of dual use life science arose. These discussions addressed the complex social, technical, political, security, and ethical issues related to dual use research. This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives.

*The Constitution of Phenomenal Consciousness* Steven M. Miller, 2015-06-15 Philosophers of mind have been arguing for decades about the nature of phenomenal consciousness and the relation between brain and mind. More recently, neuroscientists and philosophers of science have entered the discussion. Which neural activities in the brain constitute phenomenal consciousness, and how could science distinguish the neural correlates of consciousness from its neural constitution? At what level of neural activity is consciousness constituted in the brain, and what might be learned from well-studied phenomena like binocular rivalry, attention, memory, affect, pain, dreams, and coma? What should the science of consciousness want to know, and what should explanation look like in this field? How should the constitution relation be applied to brain and mind, and are other relations like identity, supervenience, realization, emergence, and causation preferable? Building on a companion volume on the constitution of visual consciousness, AiCR 90, this volume addresses these questions and related empirical and conceptual territory. It brings together for the first time scientists and philosophers to discuss this engaging interdisciplinary topic.

**Guide to the Library of Congress Classification** Lois Mai Chan, Sheila S. Intner, Jean Weihs, 2016-09-26 Like earlier editions, this thoroughly updated sixth edition of the classic textbook provides readers with a basic understanding of the Library of Congress Classification system and its applications. The Library of Congress Classification system is used in academic, legal, medical, and research libraries throughout North America, as well as worldwide. Accordingly, catalogers and librarians in these settings all need to be able to use it. The established gold standard text for Library of Congress Classification, LCC, the sixth edition of *Guide to the Library of Congress Classification* updates and complements the classic textbook's coverage of cataloging in academic and research libraries. Clear and easy to understand, the text describes the reasoning behind assigning subject headings and subheadings, including use of tables, explains the principles, structure, and format of LCC, details notation tables, assigning class numbers, and individual classes, and covers classification of special types of library materials. The last chapter of this perennially useful resource addresses the potential role of classification in

libraries of the future      Endoplasmic reticulum - shape and function in stress translation Patrick Schäfer, Lorenzo Frigerio, Federica Brandizzi, Stephen H Howell, 2015-05-05 The endoplasmic reticulum ER is a manufacturing unit in eukaryotic cells required for the synthesis of proteins lipids metabolites and hormones Besides supporting cellular signalling networks by its anabolic function the ER on its own or in communication with other organelles directly initiates signalling processes of physiological significance Based on the intimate and immediate involvement in stress signalling the ER is considered as sensory organelle on which cells strongly rely to effectively translate environmental cues into adaptive stress responses The transcellular distribution of the ER providing comprehensive cell to cell connections in multicellular organisms probably allows a concerted action of cell alliances and tissue areas towards environmental constraints At the cellular level stress adaptation correlates with the capability of the ER machinery to synthesise proteins participating in stress signalling as well as in the activation of ER membrane localised proteins to start cell protective signalling processes Importantly depending on the stress insult the ER either supports protective strategies or initiates cell death programmes Recent genetic molecular and cell biological studies have drawn an initial picture of underlying signalling events activated by ER membrane localised proteins In this Research Topic we provided a platform for articles describing research on ER morphology and metabolism with a focus on stress translation The Research Topic is sub divided into the following sections 1 ER in stress signalling and adaptation 2 ER structure and biosynthetic functions 3 Regulation of protein processing 4 Regulation of programmed cell death      **Yearbook of International Organizations 2014-2015, Volumes 1A And 1B (SET)** Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events      *Mason and McCall Smith's Law and Medical Ethics* Graeme T. Laurie, Shawn Harmon, Edward Dove, 2019 This classic textbook has provided students of medical law and ethics with a framework for exploring this fascinating subject for over 30 years Providing coverage of all of the topics found on medical law courses it gives an overview of the inter relationship between ethical medical practice and the law Medical law is significantly shaped by the courts and as such this book provides extensive coverage of recent judicial decisions as well as statutory developments The new edition continues to evolve to reflect changes in the law and shifting ethical opinions      Pathways to Urban Sustainability National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Science and Technology for Sustainability Program, Committee on Pathways to Urban Sustainability: Challenges and Opportunities, 2016-10-11 Cities have experienced an unprecedented rate of growth in the last decade More than half the world s population lives in urban areas with the U S percentage at 80 percent Cities have captured more than 80 percent of the globe s economic activity and offered social mobility and economic prosperity to millions by clustering creative innovative and educated individuals and organizations Clustering populations however can compound both positive and negative conditions with many modern urban areas experiencing growing inequality debility and environmental degradation The spread and continued growth of urban

areas presents a number of concerns for a sustainable future particularly if cities cannot adequately address the rise of poverty hunger resource consumption and biodiversity loss in their borders Intended as a comparative illustration of the types of urban sustainability pathways and subsequent lessons learned existing in urban areas this study examines specific examples that cut across geographies and scales and that feature a range of urban sustainability challenges and opportunities for collaborative learning across metropolitan regions It focuses on nine cities across the United States and Canada Los Angeles CA New York City NY Philadelphia PA Pittsburgh PA Grand Rapids MI Flint MI Cedar Rapids IA Chattanooga TN and Vancouver Canada chosen to represent a variety of metropolitan regions with consideration given to city size proximity to coastal and other waterways susceptibility to hazards primary industry and several other factors
