Resident Evil Pandemia:

A Viewing Guide to the Pandemic Richard Scheib, 2020-01-01 I have had a headache all day I am afraid of what will happen next A Viewing Guide to the Pandemic is a film book like no other It opens with the author's first hand account of the Covid 19 pandemic and life in lockdown His sense of dread and anxiety about his state of health were experiences shared with millions of others across the world Already committed to writing a book about plagues and pandemics in popular culture Covid 19 felt like a perverse twist of fate for Richard Scheib Media depictions of deadly contagions had to this point been speculative and often off the mark his book takes an in depth look at what filmmakers imagined would happen and contrasts it with the reality International in scope the book examines films in a wide variety of genres from the silent era to the present day Black Death Ebola Mad Cow Disease Bird Flu it explores fictionalized accounts of plague and pestilence such as box office hit Outbreak 1995 as well as mockumentary treatments Whether the threats depicted have a basis in reality the biowarfare of the Cold War era for instance or are more fantastical Scheib demonstrates how the fear of contagion has provided a wealth of inspiration for the big and small screen

The Pandemic Visual Regime Julia Ramírez Blanco, Francesco Spampinato, 2023 The Covid 19 pandemic has been expressed in various ways through visuality and performance and some of its more nuanced cultural implications have taken place in a realm that goes beyond words Through the exploration of the visual culture produced during and in response to the Covid 19 pandemic The Pandemic Visual Regime Visuality and Performativity in the Covid 19 Crisis highlights the key role played by images in shaping our understanding of the epochal transformations our society is undergoing This book argues that visuality and its relationships with the performative have played such a significant role in the Covid 19 pandemic that we can even speak of the emergence of a pandemic visual regime a new way of seeing and representing the world under this global emergency Through an interdisciplinary framework The Pandemic Visual Regime aims to answer an array of questions In which ways have the effects of the pandemic been racialized thereby reinforcing white supremacy How are our responses to Covid 19 shaped by the Hollywood outbreak narrative of films such as Contagion How has design responded to our new pandemic needs How have infographics affected our perception In which new ways have we come to inhabit private public and virtual space Regarding the latter what changes have there been in the forms of digital surveillance On the other side of the spectrum what forms has mutual aid taken and what have been our forms of relating with nature both during lockdown and after lockdown was over All these questions open the field to rethinking the visuality of our post pandemic zeitgeist

Diseased Cinema Robert Alpert, Merle Eisenberg, Lee Mordechai, 2023-09-29 Discusses how the depiction of diseases in movies has changed over the last century and what these changes reveal about American culture Examines disease movies as a genre that has emerged over the last century and includes pandemic and zombie films Reveals the changes to the genre's narratives over three broad time periods the beginning of film through the 1980s the 1990s through the mid 2000s and the

late 2000s and afterward Investigates the evolution of disease movies through three perspectives historically notable films remakes and franchises Analyses disease movies in the context of the development of American global capitalism and the fragmentation of the social contract Explains the role of disease movie narratives in the American experience of Covid American movies about infectious diseases have reflected and driven dominant cultural narratives during the past century These movies both real pandemics and imagined zombie outbreaks have become wildly popular since the beginning of the 21st century They have shifted from featuring a contained outbreak to an imagined containment of a known disease to a globalized uncontrollable pandemic of an unknown origin Movie narratives have changed from identifying and solving social problems to a despair and acceptance of America's failure to fulfil its historic social contract Movies reflect and drive developments in American capitalism that increasingly advocates for individuals and their families rather than communities and the public good Disease movies today minimize human differences and envisage a utopian new world order to advance the needs of contemporary American capitalism These movie narratives shaped reactions to the outbreak of Covid and reinforced individual responsibility as the solution to end the pandemic
