Paper Technical Manual's Troubleshooting Procedures Li Su,Army test measurement and diagnostic equipment activity  
redstone arsenal al,1998 As the Department of Defense DoD downsizes there is a great need to reduce the cost and  
manpower burden associated with maintenance of weapon systems Traditionally technical manuals used for field  
maintenance of DoD systems have relied heavily on troubleshooting procedures which are presented in flow chart format of  
fault trees These flow charts guide the maintainer through test procedures to isolate parts that cause equipment malfunction  
These procedures are static that is they are highly structured around a predetermined sequence of tests do not become  
smarter over time with historical maintenance data and only take into account those symptoms and faults which the original  
developer considered They are often incomplete sometimes wrong and are very difficult to update and maintain As  
maintenance evolved into the computer assisted age a major opportunity exists to significantly enhance the technical  
manuals the basic logic and information knowledge representation underlying troubleshooting procedures This paper  
provides the high lights of research and development results on the technical aspects as how to efficiently transition from  
flow chart intensive knowledge representation to a knowledge based system The results of reengineering the legacy trouble  
shooting procedures provides at least the following benefits 1 replacing fault trees with knowledge based reasoning about  
faults related to symptoms 2 providing the capability to dynamically relate faults to symptoms 3 equipping the ability to use  
historical maintenance data to continuously improve maintenance capability 4 providing more user friendly interactive  
electronic technical manuals and 5 providing the ability to house expert diagnostics information in a form that becomes  
usable and available to novice technicians      **RA 801** ,1976      **TECHNICAL MANUAL... UNIT, DIRECT SUPPORT &**
