**The Unification of Germany** Charles River Charles River Editors, 2018-09-07 Includes pictures Includes contemporary accounts Includes online resources and a bibliography for further reading When invoking the term German unification many might initially think of the tumultuous period at the end of the 20th century when communist East

Germany and democratic West Germany came together to form the modern German state. However, that was technically a reunification because Germany was first unified as a nation state in 1871. That unification formed a state much larger than today's Germany, stretching from Strasbourg in the Alsace region in today's France almost 1,500 kilometers to Königsberg, now Kaliningrad in contemporary Russia on the Baltic Sea. This unified Germany was an experiment with few historical precedents. The 19th century was indeed the Age of Nationalism, but German speakers had traditionally been spread out across Europe, including the Austrian Empire, loose confederations such as the Holy Roman Empire, and many other countries. German unity was a seemingly impossible dream held by nationalists for many years, but it became a reality when Prussia, the largest state in the German Confederation, pursued a deliberate and aggressive strategy to bring as many German-speaking territories under its control. That is not to say most Germans resisted unification because even as life in an assortment of German states had some advantages, an underlying insecurity prevailed in principalities lacking overarching authority. German-speaking lands had been the sites of some of the continent's most brutal wars. Moreover, there was a growing sense of German cultural and linguistic togetherness fostered by nationalists, artists, writers, and composers. Not surprisingly, German unity in 1871 caused geopolitical ripples that reverberated for decades. Other larger European powers, such as Britain, France, and Russia, came to feel threatened by the rise of Germany. These tensions were still prevalent at the outbreak of World War I in 1914 and became even more important in World War II. In part, this was because Germany also became an economic powerhouse, fundamentally altering the global economy. Alongside the rapid expansion of the United States, trade went through a transformation that still has ramifications today. The forces driving Germany's unification in the 19th century were similar to other trends of the era, but there were many specific and contingent factors playing out before 1871. In this respect, the unification of Germany is both an unusual and unfamiliar story.

**The Unification of Germany: The History and Legacy of the German Empire's Establishment** looks at the life and work of Germany's most famous politician and how Germany was unified. Along with pictures of important people, places, and events, you will learn about German unification like never before.

**Germany from Peace to Power?** James D. Bindenagel, 2020-08-10. A surge of political trends and upheavals all over the world confronts German foreign policy with a world that is dramatically different from Berlin. Republic unification in 1990, Brexit, American decommitment to Europe, and the rise of isolationist populist forces within Germany, as well as in other European countries, and the U.S. have undermined the foundations of Germany's foreign policy. Germany is suddenly faced with another historical shift that is starting to shake the bedrock of its foreign policy. A council of experts for strategic foresight can address Germany's strategic cultural deficit, its civilian power fixation, its resorts principle of ministerial independence, and its coalition governance conflicts.

**New Europe, New Germany, Old Foreign Policy?** Douglas Webber, 2001. The contributions to this volume analyze how and the extent to which German foreign and European policy has changed since German unification.

Reich,1993 Analyzes Germany s new role in world politics      Economic Aspects of German Unification Paul J.J.  
Welfens,2012-12-06 Paul J J Welfens The editor is pleased to present a second edition of Economic Aspects of German Unification which includes new chapters and several postscripts Almost five years after unification output in the ex GDR is back to its 1989 level Due to a massive intra German resource transfer consumption per capita in eastern Germany has not fallen as much as output and employment which reduced by one fifth within three years Given high West German transfers which represented about 5% of West German GDP and more than 50% of East German GDP the fall of industrial output could have been much stronger than had politically been feasible Hence structural change necessary for productivity growth was dramatic in the ex GDR where the goods producing sector manufacturing mining energy and construction strongly changed its proportions within four years construction almost doubled and the share of investment goods production reduced by 10 percentage points between 1990 and 1994 and is now down to 21.1 % Mining lost two thirds of its share in the producing sector which itself was reduced relative to GDP The share of the services industry increased by 5 percentage points between 1991 and 1994 but with a share of 27.7% in East Germany s GDP it was still about 9 percentage points lower than in western Germany By contrast government accounted for 20.9% of GDP in eastern Germany but for only 13.2% in western Germany
