Medusa

User Guide

Introduction

The Injectable Medicines Guide (also known as Medusa) is a resource containing monographs which give information on medicines given by intravenous injection or infusion. The information is used nationally across the UK. There are also some monographs for the administration of intra-muscular and intra-ocular injection. In addition there are numerous useful documents which can be found on the 'Documents and Links' page of the website accessed from the home page.

Accessing the on-line monographs

The website can be accessed in 2 ways:

1. Via your desktop icon
2. Via ePMA

See flow chart on Page 2

Hard copies

All clinical areas also have hard copies of the Injectable Medicines Guide containing up to 100 monographs suitable to their area. There are however far more monographs available on the website and users should always check the website if the monograph is not in their ward file. The hard copies of the Guide are updated by Medicines Information every 3 months. However, be aware that printed copies of monographs may not be the most up-to-date.

Printed copies added to the folder MUST be placed in a plastic wallet to comply with infection control standards.

Paediatrics and Neonates

Although specific paediatric Injectable Medicines Guide monographs are now available, there will be a rolling programme during Autumn 2015 to switch over to the Injectable Medicine Guide monographs where possible. In the interim, the UHL Paediatric and Neonatal Monographs should continue to be used for these groups (accessed via iNsite—search for drug name).

Intramuscular and Intra-ocular administration

The Injectable Medicines Guide also includes monographs relating to intramuscular and intra-ocular administration which can be accessed via the relevant tabs on the left hand side of the homepage.
