

## Chapter 5 – Elasticity and Its Applications

Do they depend both on the numbers of firms operating?

- What is elasticity? What kinds of factors can increase, decrease, or stabilize it?
- What is the price elasticity of demand? How is it related to the demand curve? How is it related to demand's steepness?
- What is the price elasticity of supply? How is it related to the supply curve?
- What are the income and cross-price elasticities of demand?

Key concepts:

Two things influence the level of demand:

the change in price of a good, and changes in its buyers' purchasing power.

How does the law of diminishing marginal utility affect the opportunity cost of your time, and your willingness to spend your time on leisure?

How does the income effect that you want to work less and leisure activities if you have your good, and how does the substitution effect that you want to work more to get a higher income affect you?

Measures:

- Total price elasticity measures how much the quantity demanded of a good varies in response to a change in its price.
  - One type of elasticity measures how much demand for one variable will fall if another variable rises.
- Elasticity:
  - Measuring it is somewhat measure of the responsiveness of  $Q^D$  to  $P$  or  $Q^S$  to one of its determinants.

Price Elasticity of Demand

- Price elasticity of demand measures how much  $Q^D$  responds to a change in  $P$ .
- It measures the price sensitivity of buyers' demand.

$$\text{Price elasticity of demand} = \frac{\text{Percentage change in } Q^D}{\text{Percentage change in } P}$$

Along a straight line,  $P$  and  $Q$  must change in opposite directions, which would make price elasticity negative. But we treat the minus sign and report absolute values of price elasticity.

Example:

The price elasticity of demand for apples is  $-0.75$ . If the price of apples falls by 10%,

Calculating Percentage Change

Quantity demanded will increase by \_\_\_\_\_ %.

Revenue will \_\_\_\_\_.

It will \_\_\_\_\_ if the price of apples falls by \_\_\_\_\_ %.
