[Develop on Yammer](#) Pathik Rawal,Pryank Rohilla,2015-09-09 Develop on Yammer is your guide to integrating the Yammer social network with your company s application ecosystem By developing custom apps and features on the Yammer platform you can make your workplace more productive encourage communication and feedback and get your colleagues collaborating across a range of platforms including SharePoint ASP NET and Windows Phone The book begins with an introduction to the development options available along with guidance on how to set up a Yammer developer account You ll then take your first step in Yammer integration by building a Yammer feed into a web page or other JavaScript based client application before diving into app creation and management on the Yammer platform The

authors provide a deep dive into the Yammer authorization process from client side and server side perspectives and you'll find out how to work closely with Yammer's data streams and its full range of development possibilities using Open Graph and Yammer's REST API. The final chapters cover how to build Yammer integration into standalone applications for SharePoint and Windows Phone 8 with Yammer SDKs. All chapters are illustrated with examples and sample code and a case study follows the development of a workplace training application as the authors apply each technique so you can see how to make the most of what Yammer has to offer.

What You'll Learn

- Why develop on Yammer and what development options are available
- How to add a Yammer feed to an HTML based application using Yammer Embed to bring relevant news and discussions into the contexts where they matter
- How to develop custom Yammer features for your SharePoint Office or web applications on the client side with the Yammer JavaScript SDK
- How to carry out secure authorization and authentication on Yammer
- How to use Yammer Open Graph and REST APIs to post messages, create custom activities and get data from Yammer integrated applications
- How to work with the Yammer Windows Phone 8 SDK to add Yammer functionality to a Windows Phone 8 application

Who This Book Is For

This book is targeted at developers with a background in .NET/C# development. Readers should be comfortable working with JavaScript. Software architects will also find this book valuable for planning social integration across their companies' business ecosystems.

Digital Transformation of Animal Health Data: Proceedings of the AHEAD 2017 Workshop Flavie Vial, András Székács, Sinead Quealy, 2018-08-30

The Organisation for Economic Co-operation and Development (OECD)'s Co-operative Research Programme on Biological Resource Management for Sustainable Agricultural Systems sponsored the AHEAD 2017 workshop bringing together experts from the farming and pharmaceutical industries, information and communications technology, policy research and more to create a roadmap to the digital transformation of animal health surveillance. In many countries, policy supports the reduction of antibiotic use and a growing focus in the veterinary practice is to move away from blanket dosage of antibiotics for example for mastitis. Significant and speedy improvements can take place but only with coordinated actions supported by the entire value chain. Reducing the use of antibiotics is of massive societal importance but changing on-farm or veterinary methods requires thought and a user-centred approach. The most glaring and addressable challenge is the absence of near real-time data and information. AHEAD 2017 explored how governments globally can benefit from increased digitisation in animal health. For effective monitoring it is important to first understand the relevant tasks of each stakeholder in the food value chain. In these proceedings we openly discuss and define these tasks, identify existing challenges to completion of these tasks and suggest the business opportunities. Overcoming these challenges can create value. Through this publication it is our intention to encourage open discussion, design and co-creation of an improved digital approach to animal health and drug usage in agriculture. The Workshop was sponsored by the OECD Co-operative Research Programme on Biological Resource
