superb astrophotos of star clusters, nebulae, galaxies and other celestial phenomena taken by accomplished amateur astronomers. Lavishly illustrated sections on the Moon and planets will inspire novice observers of the solar system. To accommodate the extensive revisions, NightWatch has grown from 192 pages to 208 pages. With the release of the Fifth Edition, we are also launching a new website, NightWatchBook.com, that will offer links to additional resources and will be regularly updated with information on new celestial events and equipment. Since the First Edition of NightWatch was released in 1983, the most significant transformations in amateur astronomy have been in optics and technology. For all the latest on gadgets and gear, renowned astrophotographer Alan Dyer, Dickinson's coauthor of *The Backyard Astronomer's Guide*, has contributed an entirely new chapter on basic digital astrophotography. Dyer has also modernized a key portion of an enlarged chapter on stargazing equipment, creating a welcoming place in NightWatch for today's computerized telescopes. Stargazing enthusiasts of all levels of experience will discover much of value in an enduring reference conceived by one of the most respected names in amateur astronomy. This must-have Fifth Edition includes a comprehensive all-season guide to the night sky, constellation charts covering both northern and southern hemisphere skies, making NightWatch a truly global resource; tips on choosing binoculars and telescopes and taking astrophotos; highlights of major features on the Moon to guide the budding lunar explorer; lists of solar and lunar eclipses, planet locations and the best lunar and planetary conjunctions to 2035; a range of resources for further study.
