web video transcript instructor we re asked to prove that if a line is parallel to one side of a triangle then it divides the other

two sides proportionally so pause this video and see if you can do that and you might wanna leverage

proportional segments between parallel lines concept geometry - Aug 05 2023

web transcript when a line is drawn parallel to one side in a triangle two similar triangles are formed because corresponding
angles yield the aa similarity shortcut because the triangles are similar the segments formed by the parallel line are
proportional segments

parallel lines and transversals read geometry - May 22 2022

web jul 18 2012 the triangle proportionality theorem states that if a line parallel to one side of a triangle intersects the
other two sides then it divides those sides proportionally we can extend this theorem to a situation outside of triangles where
we have multiple parallel lines cut by transversals
