Research Interviewing Elliot G. Mishler,1991-04-01 Mishler presents a powerful critique of current views on research interviewing and offers a new approach He sees traditional interviewing as suppressing discourse and argues that an interview is actually a type of narrative in which respondents should have a more extensive role as participants and collaborators The Routledge International Handbook on Narrative and Life History Ivor Goodson,Ari Antikainen,Pat Sikes,Molly Andrews,2016-10-04 In recent decades there has been a substantial turn towards narrative and life history study The embrace of narrative and life history work has accompanied the move to postmodernism and post structuralism across a wide range of disciplines sociological studies gender studies cultural studies social history literary theory and most recently psychology Written by leading international scholars from the main contributing perspectives and disciplines The Routledge International Handbook on Narrative and Life History seeks to capture the range and scope as well as the considerable complexity of the field of narrative study and life history work by situating these fields of study within the historical and contemporary context Topics covered include The historical emergences of life history and narrative study Techniques for conducting life history and narrative study Identity and politics Generational history Social and psycho social approaches to narrative history With chapters from expert contributors this volume will prove a comprehensive and authoritative resource to students researchers and educators interested in narrative theory analysis and interpretation **Narrative Inquiry** Kathleen Wells,2011 This pocket guide presents a reader friendly introduction to narrative inquiry It addresses major aspects of the design and implementation of a narrative research project emphasizing established and emerging approaches to the analysis of narrative data **Evaluation of Narrative Interview as an Assessment Method** Bijal Mavji Bharti Chheda,University of Hull,2004 The Problem-Centred Interview Andreas Witzel,Herwig Reiter,2012-06-22 This book provides the first English language account of the interview method known as the PCI Offering a way of collecting knowledge by means of involving people actively in the research process the interviewer takes the role of a well informed traveller With careful preparation and planning the interviewer sets out with priorities and expectations but the story the interviewer tells about his journey depends on the people encountered along the road Novice and experienced interview researchers across the social educational and health sciences will find this an invaluable guide to conducting interviews Andreas Witzel is senior researcher retired at the University of Bremen and former director of the Bremen Archive for Life Course Research Herwig Reiter is senior researcher in the Department of Social Monitoring and Methodology of the German Youth Institute in Munich *ECRM 2018 17th European Conference on Research Methods in Business and Management* Prof. Michela Marchiori,2018-07-12 These proceedings represent the work of researchers participating in the 17th European Conference on Research Methodology for Business and Management Studies ECRM which is being hosted this year by Universit Roma TRE Rome Italy on 12 13 July 2018 **Making Meaning of Narratives** Ruthellen Josselson,Amia Lieblich,1999-04-05 The

Handbook of Longitudinal Research Methods in Organisation and Business Studies Melanie E. Hassett, Eriikka Paavilainen-Mäntymäki, 2013-01-01 This Handbook is a very timely contribution to organization and business studies Most calls for longitudinal research are made in sections of published work that deal with limitations of the study or suggestions for further research This book places longitudinal research methods at center stage With its practical hands on approach it guides us how to design a longitudinal study in and around organizations whether qualitative or quantitative and how to implement it I warmly recommend this Handbook to ambitious senior and junior researchers It makes the commonly presented excuses for not undertaking longitudinal research completely redundant Rebecca Piekkari Aalto University School of Business in Helsinki Finland This is a very timely book that fills an important gap in the field of research methods So far very little attention has been paid to longitudinal research methods while the usefulness of this type of research has often been discussed in many papers and conferences Insights provided by scholars who have been doing this type of research provide useful guidelines for anyone interested in research methods from senior scholars to young researchers and PhD candidates This volume will serve as an excellent complement to the existing range of books on research methods Pervez Ghauri Kings College London UK This innovative Handbook demonstrates that there is no single best approach to conducting longitudinal studies At their best longitudinal research designs yield rich contextualised multilevel and deep understanding of the studied phenomenon The lack of resources in terms of time funding and people can pose a serious challenge to conducting longitudinal research This book tackles many of these challenges and discusses the role of longitudinal research programmes in overcoming such obstacles This book shows how longitudinal research methods enable the understanding of dynamics mechanisms causalities and interrelationships of organizational and business concepts in context and in relation to time It discusses the richness and versatility of longitudinal research and offers to students and experienced scholars alike numerous viewpoints reflections and personal accounts about conducting longitudinal research from planning and fieldwork to reporting and managing of research projects

Entrepreneurial Strategies of Professional Service Firms Andreas B. Günther, 2019-02-19 Over the past years knowledge intensive industries have gained significant importance as economic factor giving rise to professional service firms PSFs such as law firms accounting firms or consultancies Following this development the research interest especially in the strategies pursued by PSFs has grown substantially However past research focused mainly on strategies of established mature PSFs leaving academics as well as potential entrepreneurs without guidance on what newly founded entrepreneurial PSFs should pay attention to in order to ensure lasting competitive advantages Based on an explorative grounded theory analysis of two outstanding commercial law firm spin offs in Germany this work advances the research in this field In

addition to a detailed case study report it offers a comprehensive theoretical framework and argues that PSFs have to employ a set of seven specific entrepreneurial strategies including for example servicedelivery people development and client acquisition strategies in order to successfully manage the entrepreneurial phase In providing examples for the growing PSF industry the findings on commercial law firm spin offs also inform entrepreneurship research in other professions

definable ethics and methodology and at the same time holding up for us the incredible diversity of the field and the range of insights it offers Mary Catherine Bateson author of *Peripheral Visions* The most significant truths about human beings are to be found in the stories of their lives But what happens to those stories and to the people whose lives are told when a researcher seeks to make those stories known Ruthellen Josselson has assembled an international cast of scholars to reflect on the process of life narrative study and the ethical dilemmas that face researchers whose very mode of narrative inquiry may inevitably involve a violation of another and unwittingly lead to a sense of betrayal shame or guilt In these disarmingly candid and engaging essays narrative researchers of many different stripes talk about the morally delicate and epistemologically precarious enterprise of telling another's story The authors raise fascinating questions about who ultimately controls the tellings what happens to stories once they are told and why stories influence not only the people whose lives are told but also the tellers themselves whose own professional and personal lives may even be captured by or appropriated into the stories they are aiming to tell This exceptional volume the latest in *The Narrative Study of Lives* series is essential for researchers professionals and students in research methods including qualitative methods developmental psychology education relationships and language and discourse analysis
