1 Introduction

In this *Installation Guide* template we have included different installation scenarios based on our experience in deploying applications. As some of these may not be relevant to your installation plan, please remove those which are not applicable and, where necessary, update the sample text to reflect your system requirements. We have included sample text to illustrate the type of material that is generally provided in these documents.

1.1 Purpose of this document

Introduce the system or components to be installed. If applicable, identify any benefits that will arise from this installation, e.g. improved performance, system stability, as well as business, technological, or organizational objectives that may be achieved.

Sample introduction:

This guide covers the installation of [system] and its related components, including migrating to [system X.y.x] from [system X.x]; preparing your servers for installation of [system] and other related components; deploying your database, both manually and automatically; and database optimization and partitioning.

1.2 Identification

- Identify the system to which this document applies, e.g. title(s), abbreviation(s), version number(s), and release number(s).
- Identify any standards (ANSI, ISO, IEEE, etc) that apply to this plan.

1.3 Reference information

- Identify current sources of information that can be used for reference.
- Identify the location, status, and owners for specifications, existing documentation, art work

1.4 Points of Contact

- List the main points of contact for this document, e.g. for troubleshooting and/or queries regarding the content. Include the contact name, department, telephone number, and e-mail address.
- List the organizations that require coordination between the project and its specific support function (e.g., Development Dept, Testing Dept.).

sed & awk Dale Dougherty, Arnold Robbins, 1997-03-01 *sed awk* describes two text processing programs that are mainstays of the UNIX programmer s toolbox *sed* is a stream editor for editing streams of text that might be too large to edit as a single file or that might be generated on the fly as part of a larger data processing step The most common operation done with *sed* is substitution replacing one block of text with another *awk* is a complete programming language Unlike many conventional languages *awk* is data driven you specify what kind of data you are interested in and the operations to be performed when that data is found *awk* does many things for you including automatically opening and closing data files reading records breaking the records up into fields and counting the records While *awk* provides the features of most conventional programming languages it also includes some unconventional features such as extended regular expression matching and associative arrays *sed awk* describes both programs in detail and includes a chapter of example *sed* and *awk* scripts This edition covers features of *sed* and *awk* that are mandated by the POSIX standard This most notably affects *awk* where POSIX standardized a new variable *CONVFMT* and new functions *toupper* and *tolower* The *CONVFMT* variable specifies the conversion format to use when converting numbers to strings *awk* used to use *OFMT* for this purpose The *toupper* and *tolower* functions each take a presumably mixed case string argument and return a new version of the string with all letters translated to the corresponding case In addition this edition covers GNU *sed* newly available since the first edition It also updates the first edition coverage of Bell Labs *nawk* and GNU *awk* *gawk* covers *mawk* an additional freely

Sustainable Construction Materials and Technologies Yoon-Moon Chun, Peter Claisse, Tarun R. Naik, Eshmaiel Ganjian, 2007-05-31 The construction materials industry is a major user of the world's resources. While enormous progress has been made towards sustainability, the scope and opportunities for improvements are significant. To further the effort for sustainable development, a conference on Sustainable Construction Materials and Technologies was held at Coventry University, Coventry, U.K. from June 11th-13th, 2007, to highlight case studies and research on new and innovative ways of achieving sustainability of construction materials and technologies. This book presents selected important contributions made at the conference. Over 190 papers from over 45 countries were accepted for presentation at the conference, of which approximately 100 selected papers are published in this book. The rest of the papers are published in two supplementary books. Topics covered in this book include sustainable alternatives to natural sand, stone, and Portland cement in concrete; sustainable use of recyclable resources such as fly ash, ground municipal waste slag, pozzolan, rice husk ash, silica fume, gypsum, plasterboard, drywall, and lime in construction; sustainable mortar, concrete, bricks, blocks, and backfill; the economics and environmental impact of sustainable materials and structures; use of construction and demolition wastes and organic materials; straw bale, hemp, etc. in construction; sustainable use of soil, timber, and wood products; and related sustainable construction and rehabilitation technologies.

Implementation Guide for Turbidity Threshold Sampling Jack Lewis, 2009. Turbidity threshold sampling uses real-time turbidity and river stage information to automatically collect water quality samples for estimating suspended sediment loads. The system uses a programmable data logger in conjunction with a stage measurement device, a turbidity sensor, and a pumping sampler. Specialized software enables the user to control the sampling process, plot, and correct the data, and estimate suspended loads. This implementation guide describes the entire process, including instrumentation, installation, field procedures, software usage, data collection, laboratory methods, data interpretation, data reduction, and analysis.
