1. What is the nebular theory?

The nebular theory is a hypothesis and its the idea that a spinning cloud of dust made of mostly light elements, called a nebula, flattened into a protoplanetary disk, and became a solar system consisting of a star with orbiting planets, basically an explanation for the formation of solar systems

2. What direction is the gravitational force of the orbiting objects?

For example, let's use a satellite. The satellite moves around the Earth in a circular orbit, the direction of the force of gravity is always towards the center of the Earth.

3. What direction is the velocity of the orbiting object?

The satellite would be directed tangent to the circle at every point along its path. The
