Philosophy Goes To School:

Philosophy Goes to School Matthew Lipman,2010 Lipman examines the impact his program has had and may yet have on the process of education in philosophy Mind Your Ps and Qs Edward R. W. Makhene,2003 Very often we are forced to retract our staunchly held positions after confidently vouching for the truth of what are really opinions and beliefs masquerading as facts In this book Nellie and Jacob begin by exploring how our interpretations of what we individually perceive and conceive must coincide if we are to speak meaningfully about what is in our world tables minds colours processes etc They consider basic ways of knowing and their relationship to what is out there and what is in our minds They examine the validity of our inferences and predictions why q does not follow from p as the newspaper editorial alleges and why we can anticipate tomorrow s sunrise They ponder the gap between the language of time and the logic of time and why now cannot be a split instant during which nothing can happen but must be a certain period during which some things do happen They inquire into how our moral choices relate to their perceived causes and effects and how our lives are built around our predictions and our knowledge of apparent causes and effects They also discuss the bodily and mental natures of their own identities what meanings to attach to the different stages of their lives and the possibility of life after death

The Pursuit of Wisdom and Happiness in Education Sean Steel,2014-05-21 Explores the nature and role of wisdom in education Modern scholarship has struggled to come to terms with the meaning of wisdom and its significance in the field of education This book examines the importance of pursuing wisdom in schools by turning to ancient and medieval sources for clarification concerning the nature of wisdom Sean Steel argues that our current emphasis on the development of rigorous critical analytic thinking skills on assessment and on accountability in education has negatively impacted the ability of schools to foster an environment in which both students and teachers might pursue wisdom Although in recent times efforts have been made to incorporate the pursuit of wisdom into schools through Philosophy for Children P4C and contemplative education programming such initiatives have missed their mark Steel therefore recommends not more accountability in education for the purpose of ensuring global competitiveness but rather the institutional promotion of periods of leisure or scholē in the school day Drawing upon his own experiences as a teacher who has tried to encourage students to search for wisdom the author discusses some of the challenges and pitfalls of wisdom seeking He also offers examples of various wisdom seeking activities that might bear fruit in the classroom **Achievement Emotions in**

University Teaching and Learning, Students' Stress and Well-being Jesus de la Fuente,Douglas F. Kauffman,Meryem Yilmaz Soyly,2022-05-24 **Philosophical Inquiry with Children** Gilbert Burgh,Simone Thornton,2018-12-07 Philosophy in schools in Australia dates back to the 1980s and is rooted in the Philosophy for Children curriculum and pedagogy Seeing potential for educational change Australian advocates were quick to develop new classroom resources and innovative programs that have proved influential in educational practice throughout Australia and internationally Behind their

contributions lie key philosophical and educational discussions and controversies which have shaped attempts to introduce philosophy in schools and embed it in state and national curricula Drawing together a wide range of eminent scholars and practitioners in the field of educational philosophy this anthology the first of its kind provides not only a historical narrative but an opportunity to reflect on the insights and experiences of the authors that have made history The collection is divided into three parts The overarching theme of Part I is the early years of Philosophy for Children in Australia and how they informed the course that the philosophy in schools movement would take Part II focuses on the events and debates surrounding the development and production of new materials including arguments for and against the suitability of the original Philosophy for Children curriculum In Part III key developments relating to teaching philosophy in schools are analysed This collection of diverse views critical appraisals and different perspectives of historical currents is intended to stimulate thought provoking questions about theory and practice and to increase general awareness both nationally and internationally of the maturation of philosophy in schools in Australia It is also intended to encourage readers to identify emerging ideas and develop strategies for their implementation

On Becoming Responsible Michael S. Pritchard, 1991 Pritchard provides a deliberate and convincing argument for a starting point for the discussion of moral development on in which self regard and empathy provide equally essential groundings for individual morality Drawing essential elements from the work of Reid Strawson Rawls Kohlberg and Gilligan he builds a comprehensive framework for tracing moral development from childhood one that allows human morality to be grounded in both reason and emotion and that recognizes the importance to morality of justice and rights as well as caring and responsibility

Going to School Sharon L. Ramey, Craig T. Ramey, 1999 A landmark book for parents telling why when and how to prepare children for going to school and offering ways to support them in the critical early school years 25 photos 20 illustrations 50 charts

Reasonable Children Michael S. Pritchard, 1996 The public outcry for a return to moral education in our schools has raised more dust than it s dispelled Building upon his provocative ideas in On Becoming Responsible Michael Pritchard clears the air with a sensible plan for promoting our children s moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another s ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children s remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth telling lying making and keeping

promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education *School Executives Magazine* ,1928 **School and Home Education** ,1916 School & Society James McKeen Cattell, Raymond Walters, 1916 **School & Society** ,1916 **Reports of Cases in Law and Equity, Argued and Determined in the Supreme Court of the State of Georgia, in the Year ...** Georgia.
