# PHYSICAL SCIENCE

4th EDITION

## ABOUT THIS BOOK

You may not realize it, but you are a scientist! After all, science is simply a way of studying the world around you. If you've ever wondered what makes your soft drink bubble after you pour it in your glass, you've thought like a scientist. If you've ever tried to figure out how to make a ball bounce higher, you've acted like a scientist. Science is everywhere!

This course will take you on an amazing journey. We'll have a detailed discussion about the world around us and what makes it work. We'll work our way from protons to planets and marvel at the majesty of God's creation. Like anything worth doing, this course will require your effort, but I think you will find it interesting and even enjoyable. So be prepared to be awed and amazed by what the Creator has made, from the inner workings of atoms to the grandeur of space!

## COURSE OVERVIEW

This text contains 15 modules. Each module should take you about 2–2½ weeks to complete if you work on this course 4 days per school week for about 45 minutes to an hour each day. At this pace, you will complete the course in 34 weeks. Since most people follow school years that are longer than 34 weeks, there is some built-in “flex time.” Don't rush through a module just to make sure you complete it in 2 weeks. Set that as a goal,
