When a net force acts on an object, the object's motion will change. This means that the object's speed or direction or both will change. Acceleration is the rate at which an object's velocity changes. Velocity is a vector quantity, meaning it has both a magnitude and a direction.</p> <p>Newton's second law states that the acceleration of an object is directly proportional to the net force acting on it and inversely proportional to its mass. This means that if the net force increases, the acceleration will also increase, provided the mass does not change. Alternatively, if the mass increases, the acceleration will decrease.</p> <p>Newton's third law states that for every action, there is an equal and opposite reaction. This means that if one object exerts a force on another object, the second object exerts an equal and opposite force on the first. These forces are called action-reaction pairs. They are always equal in magnitude and opposite in direction.</p> <p>Friction is a force that opposes motion between two surfaces in contact. It is caused by the roughness of the surfaces and the interlocking of the surface molecules. Friction can be static, kinetic, or rolling. Static friction acts on objects that are not moving, kinetic friction acts on objects that are sliding, and rolling friction acts on objects that are rolling.</p> </div> <p>Answer the questions that follow.</p> <ol style="list-style-type: none"> Which of the following is not a vector quantity? <ol style="list-style-type: none"> Force Acceleration Velocity Displacement Which of the following is not a vector quantity? <ol style="list-style-type: none"> Force Acceleration Velocity Displacement Which of the following is not a vector quantity? <ol style="list-style-type: none"> Force Acceleration Velocity Displacement Which of the following is not a vector quantity? <ol style="list-style-type: none"> Force Acceleration Velocity Displacement Which of the following is not a vector quantity? <ol style="list-style-type: none"> Force Acceleration Velocity Displacement Which of the following is not a vector quantity? <ol style="list-style-type: none"> Force Acceleration Velocity Displacement Which of the following is not a vector quantity? <ol style="list-style-type: none"> Force Acceleration Velocity Displacement Which of the following is not a vector quantity? <ol style="list-style-type: none"> Force Acceleration Velocity Displacement Which of the following is not a vector quantity? <ol style="list-style-type: none"> Force Acceleration Velocity Displacement Which of the following is not a vector quantity? <ol style="list-style-type: none"> Force Acceleration Velocity Displacement <div style="text-align: right;">  </div>
