PYTHON BASED POWER SYSTEM AUTOMATION IN PSS/E MUHAMMAD USMAN KHALID, FARRUKH RASHID, WAQAR AKHTAR, MUHAMMAD HAROON GHOURI, OMER LATEEF, 2014-08-13 Systems involving minimal contributions from person are more desired these days This trend leads to introduction of automation in the processes One such system is power system Engineers have to design power system considering all the load and generation variations all types of faults and outages possible that can damage power system and are harm to its reliability All this work seemed tedious but with the advent of time several great power system simulators were introduced that made all these analyses easy and fast One is Power System Simulator for Engineers PSS E which helps in system studies and gives responses quite real But yet running different analyses for the purpose of routine check of large power systems can take many hours and it needs expertise in the software as well So there is a need of much more simpler method to perform all these analysis Luckily PSS E provides one such method It involves developing some module routine for every analysis through Python or Fortran *iCEER2014-McMaster Digest* Mohamed Bakr, Ahmed Elsharabasy, 2014-11-18 International Conference on Engineering Education and Research
