Vance, 1985 **Journal of Planning Literature** ,1986 **Agricultural Economics and Rural Sociology** Wallace C. Olsen, 1991 The first of an eight volume series The Literature of the Agricultural Sciences this book analyzes the trends in the published literature of agricultural economics and rural sociology during the past fifty years It uses citation analysis and other bibliometric techniques to identify the primary journals report series and monographs of current importance to the developed industrial countries as well as those in the Third World *American Book Publishing Record* ,1991 **Subject Guide to Books in Print** ,1996 **Subject Catalog** Library of Congress,1979 **The AALS Directory of Law Teachers** ,2004 **Bibliography of Landscape Architecture, Environmental Design, and Planning** Antoinette Paris Powell,1987

Growth Management for a Sustainable Future Gabor Zovanyi,2001-03-30 Previous books on growth management in the United States favor balanced growth which suggests that growth and environmental protection represent equally legitimate objectives Taking issue with the balanced growth position this book argues that further growth is unsustainable and that growth management must focus on ensuring ecological sustainability The book opens with the arguments supporting current global limits to growth and then shows that the growth management movement in the United States represents an institutionalized form of ongoing growth accommodation which is incongruous with sustainable behavior The book also documents the historical pro growth tendency of the planning profession and contends that this bias is impeding the necessary transition to a sustainable future In addition it presents the standards courts use to decide the legality of growth management programs and suggests that those standards do not present insurmountable obstacles to stopping future growth In conclusion this book presents operational measures of ecological sustainability and argues that the growth imperative currently driving the growth management movement must be replaced by the imperative of ecological sustainability
