

# Plant Characteristics

Plants have physical and behavioral characteristics, also known as traits, that help them grow and reproduce. Most of these characteristics are inherited from the parent plants. Some characteristics of a plant may be acquired (learned) from the effects of the environment.

## Inherited Characteristics

Inherited characteristics are the characteristics that are passed down from the parent plant to the seedling (baby plant).

Common inherited characteristics in plants include:

- the shape and color of the seeds
- the shape and size of the leaves
- the height of the stem
- the type of fruit
- growth height of the adult tree
- color of flowers

Some seedlings will look similar to the seeds or the parent plant only seedling. Other seedlings will not look like the seeds or the parent plant until they are older plants. The fact that the seedling will be almost the same as the parent plant when it is fully grown is due to inherited characteristics.
