Walks for Urban Design Barbara E. A. Piga, Daniel Siret, Jean-Paul Thibaud, 2021-08-05 The edited volume explores the topic of experiential walks which is the practice of multi or mono sensory and in motion immersion into an urban or natural environment The act of walking is hence intended as a process of re-discovering reflecting and learning through an embodied experience Specific attention is devoted to the investigation of the ambiance of places and its dynamic atmospheric perception that contribute to generating the social experience This topic is gaining increasing attention and has been studied in several forms in different disciplines to investigate the particular spatial social sensory and atmospheric character of places The book contains chapters by experts in the field and covers both the theory and the practice of innovative methods

techniques and technologies It examines experiential walks in the perspective of an interdisciplinary approach to environmental and sensory urban design by organising the contributions according to three specific interrelated focuses namely the exploration and investigation of the multisensory dimension of public spaces the different ways to grasp and communicate the in motion experience through traditional and novel forms of representation and the application of the approach to urban participatory planning and higher education Shedding new light on the topic the book offers both a reference guide for those engaged in applied research and a toolkit for professionals and students *Assets*, 2005

Character Computing Alia El Bolock, Yomna Abdelrahman, Slim Abdennadher, 2020-02-17 The book gives an introduction into the theory and practice of the transdisciplinary field of Character Computing introduced by Alia El Bolock The latest scientific findings indicate that One size DOES NOT fit all in terms of how to design interactive systems and predict behavior to tailor the interaction experience Emotions are one of the essential factors that influence people s daily experiences they influence decision making and how different emotions are interpreted by different individuals For example some people may perform better under stress and others may break Building upon Rosalind Picard s vision if we want computers to be genuinely intelligent and to interact naturally with us we must give computers the ability to recognize understand even to have and express emotions and how different characters perceive and react to these emotions hence having richer and truly tailored interaction experiences Psychological processes or personality traits are embedded in the existing fields of Affective and Personality Computing However this book is the first that systematically addresses this including the whole human character namely our stable personality traits our variable affective cognitive and motivational states as well as our morals beliefs and socio cultural embedding The book gives an introduction into the theory and practice of the transdisciplinary field of Character Computing The emerging field leverages Computer Science and Psychology to extend technology to include the whole character of humans and thus paves the way for researchers to truly place humans at the center of any technological development Character Computing is presented from three main perspectives Profiling and sensing the character Leveraging characters to build ubiquitous character aware systems Investigating how to extend Artificial Intelligence to create artificial characters

[The Unfinished Revolution](#) Michael L. Dertouzos, 2001-01-09 If our cars were as difficult to drive as our computers are to operate they would never leave the garage Yet everyday we put up with infuriating complications and incomprehensible error messages that spew forth from our technology software upgrades crash our machines Web sites take forever to download e mail overwhelms us We spend endless time on the phone waiting for automated assistance In effect we continue to serve our machines lowly needs instead of insisting that they serve us a

situation that will only get worse as millions of new mobile devices arrive on the scene Our world doesn't have to be this way It shouldn't be this way Wouldn't it be great if using your computer was as effortless as steering your car In *The Unfinished Revolution* Michael Dertouzos introduces human centered computing a radical change in the way we fashion and use computer systems that will ultimately make this goal possible *The Unfinished Revolution* is nothing less than an inspired manifesto for the future of computing Dertouzos's vision will change how businesses organizations and governments work with each other and how individuals interact It represents the dawn of a new era in information technology Human centered computing goes well beyond the empty promises of user friendly interfaces At its foundation are five key technologies that will dramatically amplify our human capabilities natural interaction automation individualized information access collaboration and customization Human centered systems will understand us when we speak to them will do much of our routine brainwork for us will get us the information we want when and where we want it will help us work with other people across space and time and will adapt on their own to our individual needs and desires By exploiting these five emerging technologies in combination in our professional specialties and in our personal lives we will see a vast increase in our productivity and a marked change in the ways we live and work Human centered technologies will make computers simpler more natural and more useful to us The collective benefits of human centered machines will give ordinary people capabilities that go beyond those enjoyed today by the most privileged Human centered systems will give us the gaspedal brakes and steering wheel of the Information Age When can all this happen Dertouzos says the time to start is now You can begin simplifying and improving your relationship with computers today Dertouzos offers dozens of scenarios that illustrate the potential of human centered computing as well as a preview of the MIT Oxygen project a prototype now under development that aims to make pervasive human centered computing a reality Dertouzos also provides the new century's first glimpse of how upcoming information technology advances will significantly improve our lives and truly revolutionize our relationships with the computer This is a book for everyone professionals and nonspecialists who yearn for machines that live up to the grand promise of the Information Revolution fulfilling real human needs with greater simplicity that still lingers unfulfilled *The Unfinished Revolution* is for those who want to enhance their computer productivity and fun in short for every person who wants to do more by doing less
