When a net force acts on an object, the object's motion will change. This means that the object's speed or direction will change. However, if the net force is zero, the object's motion will not change. This means that the object will continue to move in the same direction at the same speed. This is called Newton's first law of motion.</p> <p>Another way that forces can cause an object to change its motion is by changing its acceleration. This means that the object's speed or direction will change. This is called Newton's second law of motion. The equation for this is $F = ma$, where F is force, m is mass, and a is acceleration.</p> <p>Forces can also cause an object to change its motion by changing its velocity. This means that the object's speed or direction will change. This is called Newton's third law of motion. The equation for this is $F = mv$, where F is force, m is mass, and v is velocity.</p> </div> <p>Read the passage carefully before answering the questions that follow.</p> <ol style="list-style-type: none"> Which of the following is NOT a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is NOT a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is NOT a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is NOT a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is NOT a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is NOT a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is NOT a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is NOT a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is NOT a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force
