The Struggle to Reform Our Colleges Derek Bok, 2017-08-28 Why efforts to improve American higher educational attainment haven't worked and where to go from here During the first decade of this century many commentators predicted that American higher education was about to undergo major changes that would be brought about under the stimulus of online learning and other technological advances Toward the end of the decade the president of the United States declared that America would regain its historic lead in the education of its workforce within the next ten years through a huge increase in the number of students earning quality college degrees Several years have elapsed since these pronouncements were made yet the rate of

progress has increased very little if at all in the number of college graduates or the nature and quality of the education they receive In *The Struggle to Reform Our Colleges* Derek Bok seeks to explain why so little change has occurred by analyzing the response of America's colleges the influence of students employers foundations accrediting organizations and government officials and the impact of market forces and technological innovation In the last part of the book Bok identifies a number of initiatives that could improve the performance of colleges and universities The final chapter examines the process of change itself and describes the strategy best calculated to quicken the pace of reform and enable colleges to meet the challenges that confront them

Teaching for Learning and Learning for Teaching Christopher Klopper, Steve Drew, 2015-10-30 *Teaching for Learning and Learning for Teaching* focuses on the emerging global governmental and institutional agenda about higher education teaching quality and the role that peer review can play in supporting improvements in teaching and student outcomes This agenda is a pervasive element of the further development of higher education internationally through activities of governments global agencies institutions of higher education discrete disciplines and individual teachers Many universities have adopted student evaluations as a mechanism to appraise the quality of teaching These evaluations can be understood as providing a customer centric portrait of quality and when used as the sole arbiter of teaching performance they do not instill confidence in the system of evaluation by academic teaching staff Providing peer perspectives as counterpoint whether in a developmental or summative form goes some way to alleviating this imbalance and is the impetus for the resurgence of interest in peer review and observation of teaching This book seeks to recognize cases of peer review of teaching in Higher Education to affirm best practices and identify areas that require improvement in establishing local national and international benchmarks of teaching quality

Poison Ivy Evan Mandery, 2015-03-18 Hailed as a staggering portrait of inequality in America Philip Dray *Poison Ivy* tells the bigger seedier story of how elite colleges create paths to admission available only to the wealthy despite rhetoric to the contrary In a lively and trenchant *Washington Monthly* account Evan Mandery a Harvard graduate and current professor at a public college that serves low and middle income students reveals how tacit agreements between exclusive Ivy plus schools and white affluent suburbs create widespread de facto segregation And as a college degree continues to be the surest route to upward mobility the inequality bred in our broken higher education system is now a principal driver of skyrocketing income inequality Mandery contrasts the lip service paid to opportunity by so many elite colleges and universities with schools that actually walk the walk Now in an accessible paperback format *Poison Ivy* is a no holds barred takedown *Forbes* that synthesizes fascinating insider information on everything from how students are evaluated unfair tax breaks and questionable fundraising practices to suburban rituals testing tutoring tuition schemes and more This bold provocative indictment of America's elite colleges shows us exactly what's at stake and what will be possible if we muster the collective will to transform it
